Letter from the Officer in Charge
Head Quarters Sub Division, to the
Executive Engineer, Kishor Amrit Division
N^o 543, dated 29th June 1896.

I have the honour to report
that on the 25th at about 12 O'clock, one
cargo boat went over the ancient with
five men in it. All the men escaped
of whom one, however, died subsequently
of the injuries sustained. The boat
was lost.

The boat was sailing from Bez-
wada towards Sithanagaram. When it
crossed about 2/3 of the river, the
wind became adverse and the crew
instead of at once lowering the sail
and anchoring kept on in the hope of
getting a favourable wind. When they
found that the boat was going down and
that there was no chance for them, they
lowered the sail and dropped the anchor.
But the anchor did not catch. So the
boat came down the river and butted
against the banyan wall. It was not
able

able to pass over the anicut in
this position as there was only about
2.5 over the anicut. So it whelled
round (now it was parallel to
the body wall) and capsized over
the apron, and went down the river
floating, the cargo (bones) having been
emptied when she was upset. The
men fortunately along to the float
-ing wreck and were picked up by
the fishermen in their navas (boats) one
of them was badly injured and died
in the Hospital the same evening.
The rest were only slightly injured.
