Encls /
Proposition
Statement

Letter from the Executive Engineer
Kistna Western D^o. to the Supg Engineer
Dud Cield, dy 16th Decr. 195. No 34 S.

I have the honour to point out
that very heavy survey work will
be necessitated in connecting the
Quine Charts when they are received.
2. The Survey was I believe
made some where about 1887-88
and of course a great many
changes have occurred since then.

3. Most of the planting work
in the puiers will be completed
by the end of this month and the
three Conservancy Inspectors can
then be made available for survey
work, leaving the Overseers to attend
to work still to be carried out.

4. From the nature of the work it is
necessary that two intelligent men
should work together as owing to
water channels and the lengths
of the survey lines inter communication
will be difficult and the men at
both ends of a line or on opposite
sides of a channel must know
what to do and how to do it.

5. I therefore require a Surveyor
for 4 months. Two Conservancy Inspectors
and one Conservancy Inspector and

Examiner of P. W. Accounts, Madras.

The entries within under the head, "Present scale" have been checked and found correct [subject to exceptions noted below*].

Tabular Statement showing the proposed changes in the Establishment of the P. W. Department, Madras Presidency.

PUBLIC WORKS DEPARTMENT, MADRAS.

P. W. D. FORM.
No. M 184.

REFERENCE TO MADRAS P. W. D. CODE,
EDITION OF 1886.
PARAS. 25 & 26.

NOTES.

1. The column headed "present scale" should invariably show the sanctioned scale for the time being and not the strength of the actual (whether above or below sanctioned) establishment as it happens to stand at the time. The "present scale" should be verified by the examiner before the proposal is submitted to government for sanction (paras. 25 and 26).
 2. In the column "average or fixed pay," financial value, not mean value, should be given.
 3. The financial value should in the case of progressive appointments be calculated as follows:—
 - (1) If the period of rise from minimum to maximum is 5 years, the average will be the minimum plus two-thirds, or if the appointment is a ministerial one, plus three-fourths, of the difference between the minimum and maximum (C. S. R., Art. 164).
 - (2) If the period of growth exceeds five years (as in the case of accountants) the $\frac{1}{4}$ th fraction should be decreased by $\frac{1}{8}$ th of the difference for every year by which the period exceeds five; the fraction for periods in excess of five years will therefore be as follows:—

6 years = $\frac{1}{4}$ — $\frac{1}{8}$ = $\frac{1}{8}$	7 years = $\frac{1}{4}$ — $\frac{2}{8}$ = $\frac{1}{8}$	8 years = $\frac{1}{4}$ — $\frac{3}{8}$ = $\frac{1}{8}$
$\frac{1}{8}$ = $\frac{1}{8}$	$\frac{1}{8}$ = $\frac{1}{8}$	$\frac{1}{8}$ = $\frac{1}{8}$
- and so on; so that when the period of growth is 20 years the financial value will be the exact mean.
