Irrigation.
Account.

READ—the following papers :—

From Lieutenant-Colonel C. C. RAWSON, R.E., Superintending Engineer, V Circle, to the Chief Engineer for Irrigation, daded Kodavasal, 11th July 1895, No. 215 E.I.

I have the honour to submit, for sanction, the enclosed plans and estimate of Rs. 5,970 for raising Mudicondanar (both banks) from road No. 15 to the eastern limit of the Kumbakónam taluk.

2. In the portions where the bank carries a village road, the top width will be 10 feet; the cost (amounting to Rs. 1,370) of the extra 4 feet of widening is separately estimated for, as it has to be borne by the Local Fund Department (*vide* estimate enclosed).

3. The necessity for the work is explained in the report which accompanies the estimate.

No. V./43 T.J.

In returning herewith the plans and estimates for raising the banks of the Mudicondanar up to the limit of Kumbakónam taluk, the undersigned has the honour to request that a complete estimate, in sections, may be submitted for sanction, as it is considered the work should be taken up continuously.

2. The approval of the President, Local Fund Board, should be obtained to the estimate as it is noticed that a part of the cost is to be contributed by that Board.

(Signed) R. R. E. DRAKE-BROCKMAN, Col., R.E.,
31st July 1895. Chief Engineer for Irrigation.

From Lieutenant-Colonel C. C. RAWSON, R.E., Superintending Engineer, V Circle, to the Chief Engineer for Irrigation, dated Chepâk, 15th March 1896, No. 59 E.I.

With reference to your memo. No. V./43 T.J., dated 31st July 1895, I have the honour to inform you that an estimate for repairing the banks of the Mudicondanar from road No. 5 to No. 65, Kumbakónam taluk, amounting to Rs. 11,800, is now being worked out. The estimate from road No. 15 to limits of Kumbakónam taluk returned with your memorandum quoted above is for completing the repairs of the banks

within the limits of the Kumbakónam taluk. It was returned for the purpose of providing in it the repairs for the rest of the banks lying in the Nannilam taluk. The banks in the Nannilam taluk are in good order except in three places for which estimates have been locally sanctioned.

2. Under these circumstances, I beg that sanction may be accorded to the estimate for repairing the banks from road No. 15, which are in urgent need of attention.

3. With regard to the extra cost to be borne by the Local Fund Board, I enclose copy of the Proceedings of the Taluk Board declining to allot funds; consequently no allowance for widening has been made.

ENCLOSURE.

REPORT to accompany estimate for raising Mudicondanar (both banks) from road No. 15 to end of Kumbakónam taluk.

	RS.
Amount of estimate	5,150

1. An estimate for Rs. 11,800 for raising Mundicondanar (both banks) from head to road No. 15 sanctioned in register No. 321/90-91, is being worked out and is approching completion. The present estimate is prepared to provide for raising the remaining portions of the banks in this taluk, which are weaker than the portions now being repaired; the top of bank in many places is lower than the maximum flood level, and the over-topping of the banks which occurs every year is prevented by turf sods with great dfficulty. These turf sods will be seen over the greater portion of the banks.

2. The proposal is to raise the bank 6 feet above F.S.L. with a top width of 6 feet and side slopes 1½ to 1. The earth which will have to be obtained from patta land will have to be paid for; or in other words, compensation will have to be paid to enable kudies to level the pits excavated.

3. A lump sum of Rs. 100 is allowed for clearing jungle here and there.

(Signed) P. C. KRISHNAMA CHARI,
Sub-Divisional Officer, Tanjore.

Note by Executive Engineer.

In several places the banks run rather too close to the river margin. Banks should be kept away from the river as much as possible without, however, deviating very much from the lines proposed in survey.

31st August 1895. (Signed) T. T. RAGHAVACHARIAR,
Assistant Engineer in charge.

EXTRACT from the Proceedings of the Taluk Board, Kumbakónam, dated 29th November 1895.

The Board will not undertake this work for the present.

Disposal No. 806, dated 7th December 1895, by President, Taluk Board, Kumbakónam.

Communicated to the Executive Engineer, Tanjore district, for information with reference to his letter No. 3368, dated 24th September 1895, to the President, District Board, Tanjore.

2. The estimate is returned herewith.

No. 90 I.

Submitted to Government.

Report to accompany Estimate for Raising Mudiconda bank from Road No 15 to end of Kumbaconum Talug.

Amount of Estimate Rs 6740 5950 o.k.

(1) An estimate for Rs 1,800 for raising Mudiconda bank from head to Road No 15 sanctioned in Rejister No 321 90-91 is being worked out and is approaching completion. The present estimate is prepared to provide for raising the remaining portions of the banks of this Talug which are weaker than the portions now being repaired; the top of bank in many places is lower than the Maximum flood level and the overtopping of the banks which occurs every year is prevented by turf sods with great difficulty. These turf sods will be removed the greater portion of the banks

(2) The proposal is to raise the bank 6 ft above F.S.L. with a top width of 6 ft, & side slopes ½ to 1. ~~In the portions where the bank carries~~ a village road the width is to feet, and the cost of extra widening of 4 ft is separately estimated for (the 1370) so that it may be borne

by the Local Fund. Similarly the land required has been divided between P.W.D and Local Fund. The earth which will have to be obtained from puttah land will have to be paid for or in other words compensation will have to be paid for to enable the ~~for~~ duties to level the pits excavated.

(3) A lump sum of Rs 100 is allowed for clearing jungle here and there. 3" of Sand-spreading is allowed abt over the portions of the bank carrying road and the cost of which is included in the amount to be borne by the Local Fund hereafte.

Note by E.E. 1st) P. Krishnamachary S.D.O. Tanjore 7/7

In Several places the banks run rather too close to the River margin. Banks should be kept away from the River as much as possible without however deviating very much from the lines proposed in Survey.
