PROCEEDINGS OF THE BOARD OF REVENUE.

Proceedings of the Board of Revenue, Revenue Department, Land Revenue & Agriculture, dated 17th Decr. 1905, No. 400.

Order No. 155, dated 17th April, 1906.

1. Reported.
2. The report is interesting and the Deputy Collector contains an intelligent insight into the development of the canal irrigation.
3. The efforts to extend irrigated cultivation should be continued and details should be given in the next report as to the progress of the work. It is intended to introduce a new method of irrigation which it is intended to introduce and to which reference is made in para 10 and 15 of the Deputy Collector's report.
4. The increase in the revenue from the canal is encouraging. The Government has no doubt that the introduction of agricultural machinery from other districts will have the beneficial results anticipated, and desires to express its appreciation of the efforts of the Deputy Collector in this regard. It is, however, concerned the desirability of disposing as promptly as possible, so of the applications for lands already received.
5. It is not clear why the Deputy Collector thinks that the two minor projects referred to in para 19 of his report, will be financially successful. This must depend on whether the water of the two proposed canals will be utilized by the ryots. Information on this point should be given in the report, for the half-year ending 30th June 1906. Meanwhile orders will issue in the Public Works Department for the investigation of the projects in question.
6. The report called for from the Collector of Karnool, as to whether arrangements can be made for supplying water to such of the ryots of the Minni's villages as pay the prescribed water-rate in advance, should be submitted for the information of Government.
