Report

To accompany the Plans and Estimates for

This is one of the tanks in the Udaya-
-piri Taluk which has lately been classed
as "Imperial". The surplus arrangements
for this tank consisted of a froms escape
100ft long which was quite insufficient for
the discharge of the drainage. The tank bund,
consequently, was breached very badly in no
less than 6 places in 1892. The tank has not been
repaired since then. The present estimates
provide for extending the bywash ³⁷⁷ to 418
ft, for closing the breaches & for petty
repairs to sluices.
