READ—the following paper :—

From Major W. L. C. BADDELEY, R.E., Superintending Engineer, II Circle, to the Chief Engineer for Irrigation, dated 26th May 1896, No. 132 N.L.

I have the honour to forward herewith, for your approval and sanction of Government, plans and estimate under "Open Capital Account," amounting to Rs. 2,350, for a minor channel at 1 mile 560 feet, left bank of Gogulapalli branch channel, Sangam anicut system.

ENCLOSURES.

REPORT to accompany the plans and estimates for the Gogulapalli branch channel, Minor channel, 1 mile 560 feet, left bank, a distributary of Kanigiri canal.

Amount of estimate ... ... RS. 2,350

The estimate provides for means of irrigation for 200 acres of high level lands in the bed of the abandoned Gogulapalli tank which were intended to be irrigated by the minor channels, 0 mile 3,960 feet and 1 mile 4,470 feet, left bank of Gogulapalli branch channel. The above two channels cannot efficiently irrigate these lands, as the field channels have to pass first through very low ground, and a new channel from 1 mile 560 feet is therefore proposed. The lands to the left are to be drained into the old Aragani, and a drainage culvert is therefore proposed. The estimate further provides for a head sluice to the channel, a regulator at end and for demarcating the lands.
