**Engineer and Engineer
Subordinate Students**

The subsistence allowances of the — who passed the final examination in December 1895 and began their practical training on works in 1896, ordered to be paid with effect from 1st January 1896; and the Chief Engineer directed to post the students in suitable batches to the Consulting Architect division to enable them to undergo the usual course in equitation.

No. 968 W., 18TH MARCH 1896.

GOVERNMENT OF MADRAS.
PUBLIC WORKS DEPARTMENT.

General.
Establishment.

READ—the following paper:—

From the Hon'ble Mr. D. DUNCAN, M.A., D.Sc., Director of Public Instruction, to the Chief Engineer, Public Works Department, dated Madras, 11th March 1896, No. 2891.

In forwarding herewith copy of a letter from the Principal, College of Engineering, No. 1476 C., dated 6th instant, I have the honour to request that you will be good enough to accede to the requests of Major Love as contained therein and to observe that, to avoid any further reduction in the practical course of the students, it is desirable that they should be posted to the Consulting Architect's division during the period of their attendance in the Riding school.

From the Principal, College of Engineering, Madras, to the Director of Public Instruction, dated 6th March 1896, No. 1476 C.

I have the honour to recommend that the Engineer and Engineer Subordinate students who passed the final examination in December 1895, and who joined their divisions for the practical course about 20th February, be permitted to draw subsistence allowance from 1st January, as usual, seeing that the students cannot be held responsible for the delay which occurred.

2. This is the first occasion on which students have proceeded direct from the College to Works. Arrangements will, in future, be made with the Chief Engineer, so that no delay in posting may occur.

3. Arrangements should shortly be made by the Chief Engineer to transfer the students to Madras to go through the riding course. The full course is one of sixty lessons, and lasts practically three months. If necessary, it might be reduced to two months. Horses are available only during the hot weather, May to October inclusive, and not more than twelve students can be instructed at a time. In fixing the number to come to Madras for three months or two months, as the case may be, provision should be made for regular instruction of the students in building work in the Consulting Architect's division.

ORDER—No. 968 W., dated 18th March 1896.

In the circumstances stated, the subsistence allowances of the students who passed the final College examination in December 1895, and began their practical training on works in 1896, will be paid with effect from the 1st January 1896.

2. Arrangements will be made by the Chief Engineer to post the students in suitable batches to the Consulting Architect division, to enable them to undergo the usual course in equitation.
