(R. S. & R) No 5397 ^{Q. & B} dated 11th October
1895, calling for a report as to why
the silt clearance of the Uthandi
Spring channels should not be
undertaken by the ryots themselves,
I have the honor to report that the
proposed repairs are for deepening
of 3 spring heads and not for clearing
spring channels. These springs
are

are reported to have been silted up by the sand on the sea shore having been washed and thrown into them during the past two years and the repairs are estimated to cost Rs 311-0-0. The amount is too large to be borne by the ryots who prefer to have the Ayakat of 114 acres and 24 cents under them and 6 other springs transferred to dry or assigned at a special reduced rate of assessment, if the restoration of the springs cannot be undertaken by Government. The Ayakat lands are assessed at Rs 381-14-0 and the springs are the only sources of irrigation. There will be considerable loss of revenue to Government if the lands are to be assigned on special reduced rates and it

will be very hard and unfair to throw the cost of the repairs to the irrigation sources on the ryots when they are made to pay the assessment fixed on the presumption that the lands are irrigable from Government sources. It would be on the whole advantageous to Government to clear the silts in the springs at its cost. I therefore recommend that the estimates may be sanctioned.
