Letter from the Presidency Port Officer, Madras, No. 1412/43 G., dated 14th February 1896:-

With reference to the correspondence ending with G.O., Marine, No. 7 dated 10th January 1895, I have the honour to report that on the 21st November last the Landing and Shipping Dues Committee at Masulipatam resolved on obtaining a fresh estimate from the Public Works Department for clearing the silt out of the Tidal creek at that port. The Superintending Engineer of the Circle was asked to send the estimate direct to this office but it has not yet been received. The cost of the work is approximately Rupees (2,300) two thousand three hundred. As it is necessary that the work should be carried out at the closure of the canals next month, I request that the Superintending Engineer may be authorised by urgent instructions to proceed with the work as soon as he thinks proper, in anticipation of estimate which on receipt will be forwarded for formal sanction in the usual course.

* 1035/2442. In G.O. Marine, No. 144 of 23rd April 1894, a sum of Rupees (2,000) two thousand was sanctioned for this work but no expenditure was incurred in view of the question subsequently raised as regards providing the port with a dredger. This matter having been decided in the negative, the Committee have renewed their ^{original} proposal.

Order thereon, No. 103. Marine, dated 18th February 1896.

Orders will issue in the Public Works Department directing the Superintending Engineer to have the work taken in hand
