FEBRUARY.

Head Sluice

Sanctioning, with remarks, the execution, by the Public Works Department, of the work of constructing a new — with connecting channel, to Maruthuvakudi channel, on Veerasholam right bank, 62/6 miles, Tanjore division.

GOVERNMENT OF MADRAS.
PUBLIC WORKS DEPARTMENT.

Irrigation.

READ—the following paper :—

From Lieut.-Colonel C. C. RAWSON, R.E., Superintending Engineer, V Circle,
to the Chief Engineer for Irrigation, dated Chepāk, 20th December 1896,
No. 317 E.I.

Under paragraph 36 (c), chapter V, Volume II of the Public Works Code, I have the honour to submit for sanction, under the open capital account, the enclosed plans and estimate of Rs. 1,300 for constructing a new head sluice with connecting channel, to Maruthuvakudi channel, on Veerasholam right bank, 62/6 miles, in Kumbakonam taluk, Tanjore division.

2. The necessity for the work is explained in the report attached to the estimate.
3. The interested ryots have paid into the Kumbakonam taluk treasury Rs. 1,619, being the amount of estimate, *plus* the usual centage charges for establishment and tools and plant.

Under paragraph 79, chapter IX, Volume I of the Code, sanction is solicited to the work being undertaken by the department. The work can be completed by 31st March 1898 and is classed as unremunerative.

ENCLOSURE.

REPORT to accompany the estimate for constructing a new head sluice to the Maruthuvakudi channel, on Veerasholam right bank, 62/6 miles.

								RS.
Amount of estimate	...	...	...	...	...	...	...	1,619

The present head sluice of the Maruthuvakudi channel is in very good order (A on sketch), but is about seven miles from the lands which it commands. Between the head sluice and the point marked C, the channel receives a large amount of drainage water, to get rid of which there is an outfall sluice at C. At the point marked D, there is a second sluice, the object of which is to dam the water to a sufficiently high level to command the nunjah in the vicinity of Tondaroyampett village. It will thus be seen that the Maruthuvakudi ryots are at the mercy of those who have the control of the outfall sluice at C and the sluice at D.

The interested ryots therefore wish to have a sluice built at the site proposed (*vide sketch*) 62/6 with a small length of channel falling into old one, immediately below D, which will not only be under their own control, but save them a length of nearly two miles of channel which they have to periodically clear.

The sill of proposed sluice will be 12.00, while the bed of channel below the sluice D is about 11.83.

83. The work is one which I can strongly recommend for sanction.

(Signed) E. DADY,
Sub-Divisional Officer, Tanjore.

The execution of the work by the Public Works Department is sanctioned.

2. The Superintending Engineer should arrange for reducing the present head sluice to actual requirements as soon as the new one is built.

(True Extract.)

Under Secretary to Government,
Irrigation Branch.

To the Chief Engineer for Irrigation.
