# Public Works (1897 ) Department.

CURRENT No. 4086

From the Superintendent Engineer  
Circular

1. This work of investigation should be pushed on.
2. I would suggest that, in these dry seasons, wells might be usefully dug, in places in which water appears to exist.

No 497W  
 Safety Engineer's Office, 11th Land,  
 Bellary, 23<sup>rd</sup> April 1897.

*(Faint handwritten text, likely bleed-through from the reverse side)*

The Chief Engineer,  
Public Department,

of the capital and knowledge of successive  
District Officers, and I fear they are not

recovered in reply to your No. 2, 1848 dated  
11th April 1849. I have the honour to enclose  
the list of the 211. for 11/2 C.

your attention to this Office. 13-1-97

1. At the revised

programme of famine relief works for the lives

Rayachote Salug; and in the two latter, the two of the works in

Rayachoti Saluy (Nos 42 & 43 respectively)

because they had on invigilant  
be impracticable.

2 in Rayachoti Taluk. Of the former, the S. N. P. is now investigating the first in the list.

(No 34) which promises well, and I hope to receive

recommenced shortly. On its completion they will take up Nos 35 & 36.

4. Of the two remaining works in Rayachoti Taluq, the first (No 41) is sanctioned and can be put in hand at any time; while the last (No 42) is, so far as I can ascertain, non-existent, as the site for the proposed tank cannot be found.

5. The above few works are the result of the experience and knowledge of successive District Officers, and I fear they are unlikely to be added to. I have, however, forwarded your letter to the Collector for such further suggestions as he wishes to make, but relief works here, as elsewhere in the Circle, will probably have to take the form of road making & repairs.

I have the honor to be, Sir, your obedient servant,  
W. H. H. H.  
Assistant Engineer
