READ the followin

From the I. S. III Circle by 69C of 28 Dec 18
note by the Chief. by P. W. D. of 6. Jan 189

These papers are
be forwarded to the
Rev. Dept. for Commencement
by the Board of Revision
on the orders which
require all Local Fund
relief works to be
carried out by the P.
Dept.

2. Separate orders will be passed on the Chief Engr's recommendation that 23 temporary upper subordinates be appointed to take the places of those deputed to famine duty.

(From order in Province)

To The Rev. Dept. 1911
with papers above enclosed

W

This paper was marked
for circulation to H. H.
would in ordinary course
go on to them before
any disposal was made.

Before circulation
the paper, however, it
might be well to
send it back to H. H.
with a reply to the
last sentence of his
note. His reply appar-
ently thinks that
the extra staff sent
for relief works

was specially en-
tained for the
purpose, whereas
up to the present,
not a single extra
man of the staff or
upper subordinate
class has been
entertained. The
men sent having
been taken from
the ordinary staff
of other circles.

Public Works Department.

Note by the Chief Engineer.

From a statement received from
the Superintending Engineer III Cir-
cle, it appears that the Officers and
Upper Subordinates sent to his Cir-
cle for famine duty are employed as
follows:-

* Includes Anantapur.

Bellary Division.*

- 1 Assistant Engineer in charge of part of Bel-
lary Sub Division.
- 2 Upper Subordinates in charge of relief works.
 - 1 - do - in charge of 3 works which were
intended to be relief works but to which
no labourers would come.
 - 1 - do - preparing famine relief estimates.

Cuddapah Division.

- 1 Assistant Engineer in charge of Famine Sub-
Division.
- 3 Upper Subordinates in charge of famine relief
works.
 - 1 - do - investigating famine relief pro-
jects.

Kurnool Division.

- 3 Upper Subordinates in charge of famine re-
lief works.
 - 1 - do - preparing estimates for famine re-
lief works.

There are thus altogether 2 As-
sistant Engineers and 12 Upper Sub-
ordinates employed while it will be
seen from the statement that there
are only 8 relief works actually in
progress and three other works ~~are~~
being carried out in the ordinary
way; it will also be seen that the
number

number of labourers employed is only 13839.

Since the Superintending Engineer's statement was received 1 more Assistant Engineer and 6 more Upper Subordinates have been ordered to the III Circle so that he will have altogether 3 Assistant Engineers and 18 Upper Subordinates employed on relief works, and he states that owing to the transfer of Local Fund works to this Department, a great number more will be required.

I therefore think it right to bring to notice that if the famine gets severe the strain on this Department owing to the requirements of the New Code and the transfer of Local Fund works will be more than it can bear, and steps will have to be taken to increase the temporary establishment.

In Proceedings of the Board of Revenue, Resolution dated 25th October 1893, No. 6144 Mis., printed with G.O. No. 3116 W. dated 2nd December 1893, the number of persons for whom relief ~~will~~^{may} be required in the districts of Bellary, Anantapur, Cuddapah and Kurnool is given as 7,39,000; but it is also stated that in the great famine of 1876, the number employed on works never exceeded 1 million, and as the area of the 4 districts mentioned above is approximately $\frac{1}{4}$ th the ~~area~~ area afflicted by famine at that time it will probably be safe to assume

that

* *1893-94*

See Appendix

that work will not have to be provided for more than 3,00,000 persons. But considering that 8 relief works employing 13,839 persons necessitates the appointment of 2 Assistant Engineers and 12 Upper Subordinates, the number of officers and subordinates that will be required in the case of a severe famine can be inferred - though of course it does not follow that ^{with} double the number of works and people employed double the superintendence will be required, still to superintend famine relief works to give employment to 3,00,000 persons ~~or even half that number~~ would be more than the Department could undertake.

In these remarks I have not considered famine relief works in Ganjam and Vizagapatam to which 5 Upper Subordinates have already been posted. Should the distress there become severe or extend to other districts, the strain on this Department will be still greater.

I ~~thought~~^{think} it very advisable that the means by which this strain on the P.W. Establishment can be met should be considered now so that there may be no confusion and delay should a pressure arise hereafter, and I would make the following suggestions:-

1st

1st. As many Local Fund Works as possible should be carried out by the Local Fund Department; the object of transferring all such works to the D.P.W. is not apparent to me and does not seem to have been contemplated in the Famine Code.

2nd. That the Local Government sanction the appointment at once of ¹³~~21~~ temporary Upper Subordinates to take the place of those deputed to famine duty; the services of these men can be dispensed with should the next S.W. Monsoon be favourable. Should these proposals be sanctioned, I think it will be possible to carry on the ordinary P.W. Works in a satisfactory manner till the result of the next S.W. Monsoon is seen.

Note for H.B. the Governor

With reference to the last sentence of his earlier note of 7-1-97, it is submitted that no extra staff under Engineer and upper subordinate circles has been entertained up to this time for relief works. all the extra men are in the I and II circles for famine operations. has been withdrawn from the ordinary staff of other circles, but this course cannot be continued, and it is likely that further demands will be from the III circles. recommendation was

The Revenue B^d. should see the papers, and comment upon them.

A.S.H.
11.1.97

I think the extra man wanted to take the place of those sent on Famine Duty must be sanctioned. There is a file in circulation as to whether the Local Fund works made Famine works in Bellary S.D. be placed under the S.W. I think they should.

JG
13/1/97

I am not sure about the appointment of hands to take the place of those transferred to the 3rd circle for famine duty. The idea seems to be that these extra hands are to be kept in order that works may proceed as usual in the District not affected by famine. But I am under the impression that in case of famine it is our duty to restrict P.W. expenditure in localities not affected by famine & as to provide the means for famine relief in the Districts which are affected.

that 23 temporary men
be engaged to take the
place of those defunct
to famine duty.

This explanation
is given before circulating
the papers to the Hon. members
& before taking the action
indicated by this order.

8/1/97
W

of famine. If we are not to do
this, where is the money to come from
to fight the famine with? The regular
funds might no doubt come out
of the Prov. balance, but, in the first place
the famine affected may have no balance,
and, in our own case, although we have
a balance at this moment, we want every
anna of it for 1897-98 to supplement
the already inadequate grants under 43
& 45 proposed by India for the new
Contract. I intend bringing up the
financial position at Council tomorrow.
This question of add'l. hands for the
P.S.D. had better be brought up then.
As to the transfer of all S.F. works
to the P.S.D., I stated yesterday on the
day before on a R.D. file that I was
prepared to hear the arguments in
favour of that course, but that it
seemed to me rather foolish to solemnly
promulgate a Famine Code & then proceed
to alter it before we had given it a trial.
As at present advised, I should be agst
the transfer of local fund works to the
P.S.D.

Note by the Chief Engineer, P.W.D. d/6-1-97*

FOR ORDERS.

*6/1/97
W*

*Para. 109 of the Famine Code provides that Local Fund works will, as a rule,
be executed under the supervision of the Local Fund Engineer and his staff.
I think I am right in saying that the Revenue Secy recently proposed
that all Local Fund works in Bellary should be placed under the
Public Works Dept. and this proposal was, I think, adopted by Govt.
This departure from the provisions of the Code should be pointed out and
the papers sent to the Revenue Dept. for remarks. The entire staff
already employed seems to be in excess of requirements.*
