GOVERNMENT OF MADRAS.

REVENUE DEPARTMENT.

READ—the following Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), dated 26th May 1897, Mis. No. 3739 :—

Read—the following letter from the Collector of Cuddapah, to the Secretary to the Commissioner of Revenue Settlement and Director of the Department of Land Records and Agriculture, dated 20th May 1897, Ref. on C. No. 468-F. :—

I have the honour to state that small-pox and fever are prevalent on some of the relief works in this district, which have no medical subordinates attached to them. The District Medical and Sanitary Officer, who was asked several times to arrange for the deputation of a medical officer to each of the relief works, says that he has no more men available and that he has been informed by the Secretary to the Surgeon-General that hands will be sent as soon as they become available. There are nineteen works in progress in this district, and nine more have been ordered to be started. Of those in progress, seventeen are large works within the meaning of section 59 (a) of the Famine Code, but only five have hospital assistants attached to them. I request that the Board will assist me in obtaining eight more medical subordinates, whose services are required at once. I enclose for information a copy of the District Medical and Sanitary Officer's letter, No. 1657, dated 12th May 1897. I have been congratulating myself on the wonderfully good results in the matter of health and mortality hitherto shown on the works in this district, but I fear there must be a retrogression now during the expected change in the weather, if I am bereft of medical aid on my famine works.

Resolution—dated 26th May 1897, Mis. No. 3739.

Submitted for the orders of Government.

2. The Board cannot insist too strongly on the risks involved by the paucity of medical subordinates, but from the replies of the Secretary to the Surgeon-General it would appear that there is very little probability that more men will be immediately available for distribution.
