GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Establishment.

Read—the following papers:—

From Lieutenant-Colonel A. W. SMART, R.E., Superintending Engineer on Special duty, Tanjore, to the Chief Engineer for Irrigation, dated 11th December 1896, No. 802.

With reference to G.O., No. 2373 W., dated 17th August, I have the honour to submit a proposition statement for extra establishment required in the preparation of irrigation and drainage maps of the delta. With regard to this part of my work, I regret that I have very much under-estimated the time that would be required with the present establishment to complete what has to be done. Besides the irrigation and drainage maps, the following accounts have to be obtained from each karnam: (1) Irrigation, (2) Drainage, (3) Poramboke, (4) Statements of customary mud dams in use but not supported by documents, (5) Accounts of morais and mud dams supported by documents or pymash accounts; and I find that the Revenue accounts require some manipulation before we can get from them the information we require. The work primarily done in the Negapatam division is also faulty and has to be redone.

With the present establishment, it would take three years to complete the work, whereas with the extra establishment I now ask for, I hope to complete it within one year. It is cheaper in the end to employ a large subordinate establishment at once, rather than to carry on the work for a longer period with a smaller establishment, as in the latter case the higher-paid superior establishment has to be kept on for a longer period.
