Cuddapah Slabs

Approving and sanctioning the proposals of the Superintending Engineer, III Circle, for the supply of — from Yerraguntla to the various divisions requiring them, and communicating the papers to all officers of the Public Works Department.

ated the——

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

Read—the following papers :—

From W. J. HOWLEY, Esq., Executive Engineer, Gódávari Central Division, to the Superintending Engineer, I Circle, dated Ralli, 27th August 1896, No. 134 S.

I have the honour to bring to your notice that, for the Deputy Tahsildar's cutcherry and the Sub-Registrar's office now under construction at Kottapeta, I require over 3,850 square feet of Cuddapah slabs, 2″ thick.

2. These slabs have, I believe, usually been obtained by indent on the Executive Engineer, Cuddapah division, and those required for the Taluk cutcherry recently completed at Ellore were obtained in this manner.

3. I accordingly indented on the Executive Engineer, Cuddapah division, but he returned my indent with the letter, of which a copy is enclosed.

4. I then wrote to the contractor named by Mr. Murray; but this man (M. Pitchireddi) states that the cost at Yerraguntla station, Madras Railway, will be *Rs. 16* per square, as against *Rs. 4-3-7*, the actual cost per square, at the same station, of the slabs supplied by Mr. Murray for Ellore cutcherry.

The contractor also informs me that I must allow 20 per cent. for breakages in transit.

5. The rate allowed in the estimate for these slabs is only Rs. 45 per square, and if the price demanded by the contractor is paid, this rate will be exceeded by fully 33 per cent., if not more.

6. It is already more than three months since I first indented for these slabs; and as the Sub-Registrar's office must be finished this official year, I have the honour to request permission to pay the rate demanded, and to send a subordinate to Yerraguntla to inspect and pass the slabs before they are loaded on the railway trucks. If this latter precaution is not taken, I have no doubt that fully 20 per cent. will arrive here broken, as has been ingeniously suggested by the contractor.

Enclosure.

Copy of letter from the Executive Engineer, Cuddapah Division, to the Assistant Engineer, Gódávari Central Division, dated 4th June 1896, No. C./22.

With reference to your indents Nos. 4 and 5 of 23rd May 1896, herewith returned, I have the honour to inform you that I am not in a position to supply other divisions with Cuddapah slabs, but if you send the order to M. Pitchireddi, Proddatur, Cuddapah district, I have no doubt he will supply you with what you require.

I am surprised at your Accountant not telling you of this as he is perfectly well aware that I have written to the same effect to several Divisional officers.

No. 1120 G.D.

Submitted in original to the Chief Engineer.

It is not known if there are *now* special reasons why the Executive Engineer, Cuddapah, cannot arrange to supply these slabs, but if the department generally is to buy the excessive rate demanded by the contractor, the additional charge to Government for work of the kind all over the country will be excessive.

The Executive Engineer, Cuddapah, is not, it is believed, overburdened with work; so the matter is brought to notice for any orders you may consider necessary.

2nd September 1896. (Signed) J. C. LARMINIE,
Superintending Engineer, I Circle.

No. 3339 C.

Referred to the Superintending Engineer, III Circle, for favour of early remarks.

16th September 1896. (Signed) D. McNEIL CAMPBELL, Col., R.E.,
Chief Engineer.

From W. B. deWINTON, Esq., Superintending Engineer, III Circle, to the Chief Engineer, Public Works Department, Ootacamund, dated Bellary, 30th September 1896, No. 1922 W.

In reply to your endorsement, No. 3339 C., dated 16th September 1896, herewith returned, I have the honour to state that in Mr. Murray's absence from India on privilege leave, I am unable to explain his inability to supply other divisions with Cuddapah slabs. Probably his reason is that there are no Government quarries at Yerraguntla, and he has himself to obtain all the slabs he requires from contractors, and he, therefore, sees no reason why other division officers should not do so in like manner.

2. I think, however, that in view of the large quantity of Cuddapah slabs now used throughout the Presidency, it would be well to establish a depôt at Yerraguntla with a subordinate in charge, under the orders of the Executive Engineer, Cuddapah division, upon which officers in charge of divisions could indent for the slabs they require with some certainty that they would get sound material, properly loaded at a fixed price; and if you approve of this, I will submit a proposition statement for the necessary establishment.

3. The rate of Rs. 16 per square demanded by the contractor in the instance under reference is unintelligible. The divisional schedule of rates gives Rs. 4-3-6 per square as the rate for 2″ slabs and Rs. 6-4-0 as the rate for 3″ slabs. I believe the true rate *at the quarry* to be 1 anna per square foot for 2″ slabs, or Rs. 6-4-0 per square, and to this must be added 8 annas per square for carriage to railway.

4. As there has been considerable delay in the present instance, I have instructed the officer in charge of Cuddapah division to have the slabs required by the officer in charge of Central division, Gódávari, selected and despatched as soon as possible.

From the Superintending Engineer, III Circle, dated 22nd October 1896, No. 2149 W.

From W. B. deWINTON, Esq., Superintending Engineer, III Circle, to the Chief Engineer, Public Works Department, dated 18th January 1897, No. 3356 W.

With reference to paragraph 2 of your memo. No. 3593 C., dated 17th October 1896, I have the honour to forward, herewith, a proposition statement for the establishment required for despatching Cuddapah slabs from Yerraguntla to the various divisions of the Presidency.

Dated the

No. 268 W., 27th January 1897.

2. On reconsideration of the matter, I believe there is no necessity to establish a Government depôt at Yerraguntla, because the officer in charge of Cuddapah division informs me that a large depôt already exists close to the station belonging to private parties, which is fully stocked with slabs of the sizes most commonly in demand.

3. I therefore propose that the division storekeeper at Cuddapah, which is only 24 miles (two hours by slow train) from Yerraguntla, be given the additional title of "quarry superintendent" and an increase of pay, and that all indents received from other divisions by the officer in charge of Cuddapah division be forwarded to him for compliance.

4. I have ascertained that he can, as a rule, spare the time to go to Yerraguntla and select and superintend the loading and despatching of the best slabs available in fulfilment of indents without undue interference with his ordinary duties.

To provide for the contingency of his two duties clashing, I have given him a peon, who could remain at Yerraguntla in the storekeeper's unavoidable absence.

5. I propose that his pay should be raised from Rs. 20 to Rs. 40, and that his peon should receive Rs. 7 per mensem.

6. Under ordinary circumstances, indents should be sent to the officer in charge of Cuddapah division, but when urgent compliance is required a copy may be sent direct to the storekeeper, Cuddapah division, Cuddapah.

ORDER—No. 268 W., dated 27th January 1897.

The proposals in paragraphs 3 to 6 of the letter from the Superintending Engineer, III Circle, No. 3356 W., dated 18th January 1897, are approved and sanctioned.

2. These papers will be communicated to all officers of the Public Works Department for information.

Chapter 1, Para. 30.

1. All proposals for changes in the scales of permanent establishments must be accompanied by a statement in Part I of this form when the changes relate to the engineer or upper subordinate establishments and in other cases by a statement in Part II of this form.

2. The column headed "present scale" should invariably show the existing *sanctioned* scale (not the strength of the establishment as it actually stands at the time), and should be verified by the Examiner before the statements are forwarded to the sanctioning authority.

at Madras

Sir,

In reply to your endorsement No. 3,339 C dated 16th September 1896 herewith returned, I have the honour to state that in Mr. Murray's absence from India on Privilege leave, I am unable to explain his inability to supply other Divisions with Cuddapah slabs. Probably his reason is that there are no Government quarries at Yerraguntla and he has himself to obtain all the slabs he requires from Contractors, and he, therefore, sees no reason why other Division Officers should not do so in like manner.

2. I think, however, that in view of the large quantity of Cuddapah slabs now used throughout the Presidency, it would be well to establish a depôt at Yerraguntla, with a subordinate in charge under the orders of the Executive Engineer, Cuddapah Division,

upon

upon which, Officers in charge of Divisions could indent for the slabs they require with some certainty that they would get sound material, properly loaded at a fixed price, and if you approve of this, I will submit a proposition statement for the necessary establishment.

3. The rate of Rs 16 per square demanded by the Contractor in the instance under reference is unintelligible. The Divisional schedule of rates gives Rs 4-3-6 per square as the rate for 2" slabs and Rs 6-4-0 as the rate for 3" slabs. I believe the true rate at the quarry, to be 1 anna per square foot for 2½" slabs, or Rs 6-4-0 per square, and to this must be added 8 annas per square for carriage to railway.

4. As there has been considerable delay in the present instance, I have instructed the Officer in charge of Cuddapah Division to have the slabs required by the Officer in charge of Central Division, Godavari, selected and despatched as soon as possible.

I have the honor to be,
Sir,
Your most obedient servant

Supdg: Engineer, III Circle.

Requesting permission to pay at the rate demanded for Cuddapah slabs required for —— No 1120 G.D. Pro 3

Submitted in original to the Chief Engineer. 3 Rea

It is not known if there are now special reasons why the EE Cuddapah cannot arrange to supply these slabs but if the Department generally is to pay the excessive rate demanded by the Contractor the additional charge to Govt, for work of the kind all over the country, will be excessive.

The EE Cuddapah is not it is believed overburdened with work so if the matter is brought to notice for any reason you may consider necessary

ENCLOSURES. 1

From
W. J. Howley Esquire,
Executive Engineer
Godavari Central Division.

To
The Superintending Engineer
First Circle.

SIR,

I have the honour to bring to your notice that for the Deputy Tahsildar's Cutcherry and the Sub Registrar's Office now under Construction at Kottapeta, I require over 3,850 square feet of Cuddapah slabs 2" thick.

2. These slabs have, I believe, usually been obtained by indent on the Executive Engineer, Cuddapah Division, and those required for the Taluq Cutcherry recently Completed at Ellore were obtained in this manner.

3. I accordingly indented on the Executive Engineer

Cuddapah Division, but he returned my indent with the letter of which a copy is enclosed.

4. I then wrote to the Contractor named by Mr Murray; but this man (Mr. Pitchireddi) states that the cost at Yerraguntla station, Madras Railway, will be Rs 16 per square, as against Rs 4.3.7 the actual cost per square, at the same station of the slabs supplied by Mr. Murray for Ellore Cutcherry.

The Contractor also informs me that I must allow 20 % for breakages in transit.

5. The rate allowed in the Estimate for these slabs is only Rs 45 per square, and if the price demanded by the Contractor is paid this rate will be exceeded by fully 33 %, if not more.

6. It is already more than 3 months since I first indented for these slabs; and as the Sub Registrar's Office must be finished this Official year I have the honour to request permission to pay the rate demanded, and to send a Subordinate to Yerraguntla to inspect and pass the slabs before they are loaded on the railway trucks. If this latter precaution is not taken, I have no doubt that fully 20 % will arrive here broken, as has been ingeniously suggested by the Contractor.

I have the honour to be,
Sir,
Your most obedient Servant,

W J Howley
Executive Engineer
Godavari Central Division.
