*Read*—the following Proceedings of the Board of Revenue (Land Revenue), Mis. No. 983, dated 15th March 1897:—

Read—the following letter from J. ANDREW, Esq., Acting Collector, Tanjore, to the Secretary to the Commissioners of Land Revenue, dated 24th February 1897, No. 841/Rev:—

With reference to Board's Proceedings, Mis. No. 3056, dated 4th July 1896, communicating the order of Government, Revenue Department, Mis. No. 2530, dated 29th June 1896, transferring to the Public Works Department, for the issue of necessary orders for the preparation of plan and estimate for the improvements to the sub-jail at Tiruvadi, I have the honour to forward, herewith, an estimate for Rs. 3,410, with plan, &c., received from the Superintending Engineer, V Circle, and to request that the sanction of Government may be obtained for executing the work by the Public Works Department.

---

Resolution—Mis. No. 983, dated 15th March 1897.

The plan and the estimate for Rs. 3,410 for improvements to the sub-jail at Tiruvadi are submitted for the sanction of Government, with reference to G.O., No. 2024 W., dated 14th July 1896, communicated with G.O., No. 2909, Revenue, dated 22nd July 1896.

(True Copy and Extract.)

(Signed) G. STOKES,
Ag. Secretary to Government.

---

From Lieutenant-Colonel C. C. RAWSON, R.E., Superintending Engineer, V Circle, to the Chief Engineer, Public Works Department, dated Chepâk, 29th July 1897, No. 291 W.

With reference to your memo., No. 2721 C., dated 1st June 1897, I have the honour to inform you that the width of concrete in foundations for partition wall has been altered to 2½ feet. The depth, 4½ feet, is necessary owing to the nature of soil—namely surface soil, alluvial, for 1 foot in depth, below sandy earth. The existing depth of foundations to the building is 4½ feet and mean width 2¾ feet.

2. No urinals are necessary, as the prisoners during the day are taken to the latrine within the compound, and during the night are provided with earthen pots. The building also stands on the public road on one side, where a pucka drain from the male wards cannot be constructed without encroaching on the public road, and on the other side without encroaching on private ground; apart from this there is no drain of any kind with which these inlets could be connected within a reasonable distance.

3. The number of uprights, struts and rafters to weather-boards has been increased by reducing the distance between them to 2½ feet as suggested by you. The width of planking has been increased to allow of overlapping to prevent leakage.

4. The old materials in the building cannot be used as the roofing materials are of palmyrah, the posts and beams of country wood which are not of sufficient length to be used unless they are cut up for the weather-boards in front of the female wards, but the quantity for this is so small that it is scarcely worth while doing it.

5. Instead of table-moulded bricks I have provided platform-moulded bricks, as the walls have to be plastered and the quantity required is not great.

6. The plan and revised estimate are herewith submitted.

Order—No. 2709 W., dated 29th September 1897.

The estimate, amounting to Rs. 3,350, for improving the sub-jail attached to the Sub-Magistrate's court at Tiruvadi, in the Tanjore district, is sanctioned for execution when funds are available.

2. This sanction has been registered as Provincial No. 48 W. of 1897–98, and classified as "Civil Buildings—Original Works."

Current No. 7562

Letter No. 291 W

Dated 29th July 1897.

From the Supg. Engineer V Circle.

NOTE BY TECHNICAL SECTION.

Name of work. Improvements to the Sub jail attached to the Sub-Magistrate's Court at Tiruvadi in the Tanjore District.

Amount of estimate Rs 3,350.

"Flag C"

× With reference to this Office Memo No. 2721 C dated 1st June 1897, the S.E. V Circle, resubmits the estimate for improving the Sub-jail attached to the Sub Magistrate's Court at Tiruvadi in the Tanjore District duly revised as per instructions contained in the Memo under reference.

The revised estimate provides for a reduced width of concrete foundations to the new partition walls from 3'6" as provided in the original estimate to 2'6" and the depth of 4'6" is allowed owing to the nature of the soil viz. alluvial surface soil for a depth of one foot and sandy earth below.

The depth of the existing foundations to the building is reported to be $4\frac{1}{2}$ feet & its mean width $2\frac{3}{4}$ ft.

The provision of urinals, viz. masonry sinks with galvanised iron bucket

P. W. 60
250—23-4-97.

brackets placed outside the wards has now been omitted owing it is reported, that the prisoners are taken during the day to the latrine within the compound & during the nights supplied with earthen pots. Further it is reported that as the building stands on the public road on one side & private land on the other, a masonry drain, as suggested in the memo under reference could not be built without encroaching on the public road & private land.

The number of uprights, struts & rafters to the weather board in front of the female wards have now been increased by reducing the distance between them from 6 feet as originally provided to 2½ feet.

The old materials available from the existing building are reported to be of Palmyrah & the posts & beams of country wood of insufficient length & unfit for the proposed work except for the weather board in front of the female wards & that the quantity they obtained will be so small that it is not worth noticing.

The estimate has been reduced from Rs 3410 as originally submitted to Rs 3350.

14.8.97.

The estimate may now be sanctioned.
