Fortnightly Narrative.

Recording Board's Proceedings submitting to Government, with remarks, — of the Vizagapatam district for the period ending 15th August 1897.

155 08 R 1/10

GOVERNMENT OF MADRAS.

REVENUE DEPARTMENT.

Read—the following Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), No. 598, dated 31st August 1897 :—

Read—the following Fortnightly Narrative for the Vizagapatam district during the period ending 15th of August 1897 :—

State of the Country.

Rainfall and water-supply—

District rainfall.	Actual rainfall.	Expected rainfall.
	INS.	INS.
In the fortnight	3·96	6·08
Up to the fortnight	19·37	26·64

Rainfall very deficient in the fortnight except in the Senior Assistant Collector's division and parts of Golgonda and Srungavarapukota. It is very poor in Bimlipatam, Vizagapatam, Vizianagram, Chípurupalle and Gajapatinagaram.

Water for drinking scarce in Vizagapatam. Water for irrigation sufficient in Salúru, Bobbili, Párvatípuram, Palkonda, parts of Viravilli, Srungavarapukota and Golgonda, but very deficient elsewhere. In many places tanks are empty and must be filled shortly, or crops will be ruined. Such rain as has fallen in the coast tracts is insufficient to affect the tanks.

Agricultural operations and condition of the standing crops.—Paddy being transplanted in Palkonda and the Senior Assistant's division and in Golgonda. In these taluks it is doing well. Transplantation has taken place on some lands in Sarvasiddhi and Anakápalle under river channels, but these are now dry and another fresh is badly wanted. Paddy in Vizianagram, Bimlipatam, Chípurupalle, Northern Anakápalle and parts of Gajapatinagaram is withering or failing for want of water in tanks. Dry crops are middling to good in most places, but withered in Vizagapatam, the coast of Bimlipatam and Chípurupalle, and Northern Anakápalle. Vizagapatam taluk is almost a desert. Early ragi is generally harvested ; outturn poor to middling.

Cumbu just beginning to be harvested ; outturn middling to fair, and in a few places good, in others bad, but a middling to fair crop on the whole.

Supply of fodder and pasture and condition of cattle.—Pasture ample, except in Vizagapatam and a portion of Anakápalle.

Fodder improving with harvest of early dry crops, and the cutting of withered crops for fodder.

Cattle good, except in Vizagapatam, and portions of Anakápalle.

General remarks on the previous subjects.—The improvement in the agricultural outlook reported last fortnight, has not been maintained. Except in Palkonda, the Senior Assistant's division, Golgonda and parts of Viravilli and Srungavarapukota, the prospects of paddy are very doubtful or very poor. Dry crop prospects generally pretty fair, but bad in the coast strip and very bad in Vizagapatam taluk. Accounts of Gajapatinagaram lately received are not very favourable either. What is required is some heavy tank-filling rain, and this has not been received except in the favoured Párvatípuram division and Golgonda. Freshes in the rivers in the south of the district are also badly needed.

Food-supplies and the state of the Markets.

Prices of principal food-grains at principal markets in the affected tracts, in seers of 80 tolas per rupee, for the period ending 15th of August 1897.

Trade active.

Condition of the People.

On works.—Generally good.

In villages.—The condition of the general population is good enough. Those in receipt of village relief are generally in very poor condition. This form of relief has been reduced to a minimum, and it is practically only granted to those who are in poor condition.

Sickness and Mortality.—Cholera prevalent ; also dysentery and fever.

Remarks.—The area requiring relief is contracting with the improved condition existing in some of the taluks to which relief was latest extended, and will probably contract to something like the limits to which it extended in the early hot weather, but within most of these limits distress is at present not decreasing.

Measures of Relief.

Works.—In what taluks open and comparison of numbers—

Private charity—Much contracted.

General remarks.—As stated the season has not maintained its improvement and in Vizagapatam, parts of Anakápalle, Bimlipatam and Chipurupalle it is absolutely bad. It can no longer be denied that this south-west monsoon is a partial failure and a complete one in some places. A good paddy crop can now hardly be expected in any event, and there is a great probability of a very bad one, though prospects are very favourable in four or five taluks. The imminent harvest of dry grains will probably cause a fall in prices sufficient to drive all the coolies off the works by lowering their wages to the vanishing point, but unless they go away for this reason I see but small chance of closing the works in the Vizagapatam taluk at least before the north-east monsoon. My intention to close relief by the end of this month has undergone a change. It certainly cannot be done, though it can be largely contracted by abolishing all kitchens and circles in the most favoured taluks. I am gradually doing this now. Poor as this south-west monsoon is, we may manage if it does not fail us altogether and if we get a good north-east in October. Prospects at present are by no means completely re-assuring.

(b) In all these cases fodder, seed-grain and cattle were applied for in one and the same application.

Inspections of the District Officers.

Taluks and places visited.

Principal Assistant Collector.

Palkonda taluk	Palkonda.
Chípurupalle taluk	Chípurupalle-Laveru (work and kitchen), Ranasthalam (kitchen), six other villages to muster recipients of grain doles.
Bimlipatam taluk	Bhogapuram, Tallavalsa (kitchens), Dakamarri, Padmanabham (works), fifteen other villages for grain doles.
Vizianagram taluk	Pusapatirega (work and kitchen), Vizianagram (kitchen), Rellivalasa.

Senior Assistant Collector.

Párvatípuram taluk	Kottavalsa, Nagore, Marripenta, Vullibadra, Balagudaba and Narsipuram.
Bobbili taluk	Fifteen villages and four kitchens.
Sálúru taluk	Rambhadrapur, Makkuva kitchens, Bodavalsa and Payalapadu.

Head Assistant Collector.

Víravilli taluk	Chódavaramu, Waddadi, Rajam and surrounding villages.
Sarvasiddhi taluk	Yellamanchili (work and kitchen), Kondakarla kitchen and surrounding villages.
Anakápalle taluk	Anakápalle (kitchen), Mamidipalem and surrounding villages, Paravada (kitchen) and other villages, Aganampudi, Tallapalem, Kammarapalem and other villages.

Huzur Deputy Collector.

Vizagapatam taluk	Half the taluk.
Srungavarapukota taluk	About three quarters of the taluk.

Collector.

Vizianagram taluk	Vizianagram weavers' depót, &c.
Chípurupalle taluk	Pondur, Niddam and Chípurupalle.
Palkonda taluk	Rajam and Boddam.
Vizagapatam taluk	Gazuvaka, Karasa, Maduravada, Vemulavalasa.
Bimlipatam taluk	Dakamarri, Padmanabham, Bimlipatam and Chittivalasa.

Resolution—No. 598, dated 31st August 1897.

Submitted for the information of Government.

2. The rainfall of the fortnight was, on the average, much below what was expected. Good rain however fell in the interior of the district, the average being reduced by the deficient fall in the coast taluks. Fair rain has, however, been since received in the latter area. Away from the coast, crops were doing well, but nearer the sea, crops were fading for want of rain, and the area of cultivation was considerably restricted.

3. Ragi had been, and cumbu was being, harvested at the time of report, and though the outturn was not good, the new supply has had an appreciable effect on the market, the price of dry grains having fallen considerably. The price of rice, however,

is higher than in the great famine of 1877–78. The comparative position of prices is shown by the following figures :—

Rate.	Measures for a rupee.		
	Rice.	Ragi.	Cumbu.
Normal	15·0	28·0	30·0
Warning	12·0	21·0	22·5
Scarcity	9·0	14·0	15·0
Current	7·5	12·8	11·5
August 1892	10·0	18·4	16·9
Do. 1878	7·6	16·4	17·2

Imports continued in a considerable, though reduced, scale, while exports show a large increase.

4. The harvesting of these crops and the loss of them over considerable areas had very materially increased the supply of fodder, while pasture was generally ample. Except in Vizagapatam and parts of Anakápalle, the outlook for agricultural stock is therefore improving.

5. The condition of the people is reported generally good, though there was a considerable amount of sickness about. The numbers on works decreased by 17 per cent., and in gratuitous relief by nearly 50 per cent. The decreases are due partly to the improvement in the season in the inland taluks, and partly to the fall in the prices of dry grains, which has reduced the wages of labourers. The Collector hopes to close shortly all gratuitous relief in the inland taluks. In the coast taluks, prospects were not bright, and the Collector entertained but little prospect of closing relief at the end of the month, as he hoped at one time.

6. Fair work was done in the disposal of loans, but numerous applications for loans to buy cattle and fodder yet remain to be disposed of.

Private charity—Much contracted.

General remarks.—As stated the season has not maintained its improvement and in Vizagapatam, parts of Anakápalle, Bimlipatam and Chípurupalle it is absolutely bad. It can no longer be denied that this south-west monsoon is a partial failure and a complete one in some places. A good paddy crop can now hardly be expected in any event, and there is a great probability of a very bad one, though prospects are very favourable in four or five taluks. The imminent harvest of dry grains will probably cause a fall in prices sufficient to drive all the coolies off the works by lowering their wages to the vanishing point, but unless they go away for this reason I see but small chance of closing the works in the Vizagapatam taluk at least before the north-east monsoon. My intention to close relief by the end of this month has undergone a change. It certainly cannot be done, though it can be largely contracted by abolishing all kitchens and circles in the most favoured taluks. I am gradually doing this now. Poor as this south-west monsoon is, we may manage if it does not fail us altogether and if we get a good north-east in October. Prospects at present are by no means completely re-assuring.

GOVERNMENT OF MADRAS.

REVENUE DEPARTMENT.

Read—the following Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), No. 598, dated 31st August 1897 :—

Read—the following Fortnightly Narrative for the Vizagapatam district during the period ending 15th of August 1897 :—

STATE OF THE COUNTRY.

Rainfall and water-supply—

District rainfall.	Actual rainfall.	Expected rainfall.
	INS.	INS.
In the fortnight	3·96	6·08
Up to the fortnight	19·37	26·64

Rainfall very deficient in the fortnight except in the Senior Assistant Collector's division and parts of Golgonda and Srungavarapukota. It is very poor in Bimlipatam, Vizagapatam, Vizianagram, Chípurupalle and Gajapatinagaram.

Water for drinking scarce in Vizagapatam. Water for irrigation sufficient in Salúru, Bobbili, Párvatípuram, Palkonda, parts of Viravilli, Srungavarapukota and Golgonda, but very deficient elsewhere. In many places tanks are empty and must be filled shortly, or crops will be ruined. Such rain as has fallen in the coast tracts is insufficient to affect the tanks.

Agricultural operations and condition of the standing crops.—Paddy being transplanted in Palkonda and the Senior Assistant's division and in Golgonda. In these taluks it is doing well. Transplantation has taken place on some lands in Sarvasiddhi and Anakápalle under river channels, but these are now dry and another fresh is badly wanted. Paddy in Vizianagram, Bimlipatam, Chípurupalle, Northern Anakápalle and parts of Gajapatinagaram is withering or failing for want of water in tanks. Dry crops are middling to good in most places, but withered in Vizagapatam, the coast of Bimlipatam and Chípurupalle, and Northern Anakápalle. Vizagapatam taluk is almost a desert. Early ragi is generally harvested ; outturn poor to middling.

Cumbu just beginning to be harvested ; outturn middling to fair, and in a few places good, in others bad, but a middling to fair crop on the whole.

Supply of fodder and pasture and condition of cattle.—Pasture ample, except in Vizagapatam and a portion of Anakápalle.

Fodder improving with harvest of early dry crops, and the cutting of withered crops for fodder.

Cattle good, except in Vizagapatam, and portions of Anakápalle.

General remarks on the previous subjects.—The improvement in the agricultural outlook reported last fortnight, has not been maintained. Except in Palkonda, the Senior Assistant's division, Golgonda and parts of Viravilli and Srungavarapukota, the prospects of paddy are very doubtful or very poor. Dry crop prospects generally pretty fair, but bad in the coast strip and very bad in Vizagapatam taluk. Accounts of Gajapatinagaram lately received are not very favourable either. What is required is some heavy tank-filling rain, and this has not been received except in the favoured Párvatípuram division and Golgonda. Freshes in the rivers in the south of the district are also badly needed.

FOOD-SUPPLIES AND THE STATE OF THE MARKETS.

Prices of principal food-grains at principal markets in the affected tracts, in seers of 80 tolas per rupee, for the period ending 15th of August 1897.

CONDITION OF THE PEOPLE.

On works.—Generally good.

In villages.—The condition of the general population is good enough. Those in receipt of village relief are generally in very poor condition. This form of relief has been reduced to a minimum, and it is practically only granted to those who are in poor condition.

Sickness and Mortality.—Cholera prevalent ; also dysentery and fever.

Remarks.—The area requiring relief is contracting with the improved condition existing in some of the taluks to which relief was latest extended, and will probably contract to something like the limits to which it extended in the early hot weather, but within most of these limits distress is at present not decreasing.

MEASURES OF RELIEF.

Works.—In what taluks open and comparison of numbers—

Taluks.	Number employed. Last fortnight.	Number employed. This fortnight.	Remarks.
Relief works.	RS.	RS.	
I. Bobbili taluk—			
1. Bobbili-Akulakotta road work ..	1,868	..	Closed, coolies having fallen to 87 and season being very favourable in that part.

(a) These applications are included in the figure shown in column 28.

(b) In all these cases fodder, seed-grain and cattle were applied for in one and the same application.

Inspections of the District Officers.

Taluks and places visited.

Principal Assistant Collector.

Palkonda taluk	Palkonda.
Chípurupalle taluk	Chípurupalle-Laveru (work and kitchen), Ranasthalam (kitchen), six other villages to muster recipients of grain doles.
Bimlipatam taluk	Bhogapuram, Tallavalsa (kitchens), Dakamarri, Padmanabham (works), fifteen other villages for grain doles.
Vizianagram taluk	Pusapatirega (work and kitchen), Vizianagram (kitchen), Rellivalasa.

Senior Assistant Collector.

Párvatípuram taluk	Kottavalsa, Nagore, Marripenta, Vullibadra, Balagudaba and Narsipuram.
Bobbili taluk	Fifteen villages and four kitchens.
Sálúru taluk	Rambhadrapur, Makkuva kitchens, Bodavalsa and Payalapadu.

Head Assistant Collector.

Víravilli taluk	Chódavaramu, Waddadi, Rajam and surrounding villages.
Sarvasiddhi taluk	Yellamanchili (work and kitchen), Kondakarla kitchen and surrounding villages.
Anakápalle taluk	Anakápalle (kitchen), Mamidipalem and surrounding villages, Paravada (kitchen) and other villages, Aganampudi, Tallapalem, Kammarapalem and other villages.

Huzur Deputy Collector.

Vizagapatam taluk	Half the taluk.
Srungavarapukota taluk	About three quarters of the taluk.

Collector.

Vizianagram taluk	Vizianagram weavers' depôt, &c.
Chípurupalle taluk	Pondur, Niddam and Chípurupalle.
Palkonda taluk	Rajam and Boddam.
Vizagapatam taluk	Gazuvaka, Karasa, Maduravada, Vemulavalasa.
Bimlipatam taluk	Dakamarri, Padmanabham, Bimlipatam and Chittivalasa.

Resolution—No. 598, dated 31st August 1897.

Submitted for the information of Government.

2. The rainfall of the fortnight was, on the average, much below what was expected. Good rain however fell in the interior of the district, the average being reduced by the deficient fall in the coast taluks. Fair rain has, however, been since received in the latter area. Away from the coast, crops were doing well, but nearer the sea, crops were fading for want of rain, and the area of cultivation was considerably restricted.

3. Ragi had been, and cumbu was being, harvested at the time of report, and though the outturn was not good, the new supply has had an appreciable effect on the market, the price of dry grains having fallen considerably. The price of rice, however,

is higher than in the great famine of 1877–78. The comparative position of prices is shown by the following figures :—

Rate.	Measures for a rupee.		
	Rice.	Ragi.	Cumbu.
Normal	15·0	28·0	30·0
Warning	12·0	21·0	22·5
Scarcity	9·0	14·0	15·0
Current	7·5	12·8	11·5
August 1892	10·0	18·4	16·9
Do. 1878	7·6	16·4	17·2

Imports continued in a considerable, though reduced, scale, while exports show a large increase.

4. The harvesting of these crops and the loss of them over considerable areas had very materially increased the supply of fodder, while pasture was generally ample. Except in Vizagapatam and parts of Anakápalle, the outlook for agricultural stock is therefore improving.

5. The condition of the people is reported generally good, though there was a considerable amount of sickness about. The numbers on works decreased by 17 per cent., and in gratuitous relief by nearly 50 per cent. The decreases are due partly to the improvement in the season in the inland taluks, and partly to the fall in the prices of dry grains, which has reduced the wages of labourers. The Collector hopes to close shortly all gratuitous relief in the inland taluks. In the coast taluks, prospects were not bright, and the Collector entertained but little prospect of closing relief at the end of the month, as he hoped at one time.

6. Fair work was done in the disposal of loans, but numerous applications for loans to buy cattle and fodder yet remain to be disposed of.

SEPTEMBER.

Fortnightly Narrative.

Recording Board's Proceedings submitting to Government, with remarks, — of the Vizagapatam district for the period ending 15th August 1897.

GOVERNMENT OF MADRAS.

REVENUE DEPARTMENT.

Read—the following Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), No. 598, dated 31st August 1897 :—

Read—the following Fortnightly Narrative for the Vizagapatam district during the period ending 15th of August 1897 :—

STATE OF THE COUNTRY.

Rainfall and water-supply—

District rainfall.	Actual rainfall.	Expected rainfall.
	INS.	INS.
In the fortnight	3·96	6·08
Up to the fortnight	19·37	26·64

Rainfall very deficient in the fortnight except in the Senior Assistant Collector's division and parts of Golgonda and Srungavarapukota. It is very poor in Bimlipatam, Vizagapatam, Vizianagram, Chípurupalle and Gajapatinagaram.

Water for drinking scarce in Vizagapatam. Water for irrigation sufficient in Salúru, Bobbili, Párvatípuram, Palkonda, parts of Viravilli, Srungavarapukota and Golgonda, but very deficient elsewhere. In many places tanks are empty and must be filled shortly, or crops will be ruined. Such rain as has fallen in the coast tracts is insufficient to affect the tanks.

Agricultural operations and condition of the standing crops.—Paddy being transplanted in Palkonda and the Senior Assistant's division and in Golgonda. In these taluks it is doing well. Transplantation has taken place on some lands in Sarvasiddhi and Anakápalle under river channels, but these are now dry and another fresh is badly wanted. Paddy in Vizianagram, Bimlipatam, Chípurupalle, Northern Anakápalle and parts of Gajapatinagaram is withering or failing for want of water in tanks. Dry crops are middling to good in most places, but withered in Vizagapatam, the coast of Bimlipatam and Chípurupalle, and Northern Anakápalle. Vizagapatam taluk is almost a desert. Early ragi is generally harvested ; outturn poor to middling.

Cumbu just beginning to be harvested ; outturn middling to fair, and in a few places good, in others bad, but a middling to fair crop on the whole.

Supply of fodder and pasture and condition of cattle.—Pasture ample, except in Vizagapatam and a portion of Anakápalle.

Fodder improving with harvest of early dry crops, and the cutting of withered crops for fodder.

Cattle good, except in Vizagapatam, and portions of Anakápalle.

General remarks on the previous subjects.—The improvement in the agricultural outlook reported last fortnight, has not been maintained. Except in Palkonda, the Senior Assistant's division, Golgonda and parts of Viravilli and Srungavarapukota, the prospects of paddy are very doubtful or very poor. Dry crop prospects generally pretty fair, but bad in the coast strip and very bad in Vizagapatam taluk. Accounts of Gajapatinagaram lately received are not very favourable either. What is required is some heavy tank-filling rain, and this has not been received except in the favoured Párvatípuram division and Golgonda. Freshes in the rivers in the south of the district are also badly needed.

FOOD-SUPPLIES AND THE STATE OF THE MARKETS.

Prices of principal food-grains at principal markets in the affected tracts, in seers of 80 tolas per rupee, for the period ending 15th of August 1897.

CONDITION OF THE PEOPLE.

On works.—Generally good.

In villages.—The condition of the general population is good enough. Those in receipt of village relief are generally in very poor condition. This form of relief has been reduced to a minimum, and it is practically only granted to those who are in poor condition.

Sickness and Mortality.—Cholera prevalent ; also dysentery and fever.

Remarks.—The area requiring relief is contracting with the improved condition existing in some of the taluks to which relief was latest extended, and will probably contract to something like the limits to which it extended in the early hot weather, but within most of these limits distress is at present not decreasing.

MEASURES OF RELIEF.

Private charity—Much contracted.

General remarks.—As stated the season has not maintained its improvement and in Vizagapatam, parts of Anakápalle, Bimlipatam and Chipurupalle it is absolutely bad. It can no longer be denied that this south-west monsoon is a partial failure and a complete one in some places. A good paddy crop can now hardly be expected in any event, and there is a great probability of a very bad one, though prospects are very favourable in four or five taluks. The imminent harvest of dry grains will probably cause a fall in prices sufficient to drive all the coolies off the works by lowering their wages to the vanishing point, but unless they go away for this reason I see but small chance of closing the works in the Vizagapatam taluk at least before the north-east monsoon. My intention to close relief by the end of this month has undergone a change. It certainly cannot be done, though it can be largely contracted by abolishing all kitchens and circles in the most favoured taluks. I am gradually doing this now. Poor as this south-west monsoon is, we may manage if it does not fail us altogether and if we get a good north-east in October. Prospects at present are by no means completely re-assuring.

Palkonda taluk	Rajam and Boddam.
Vizagapatam taluk	Gazuvaka, Karasa, Maduravada, Vemulavalasa.
Bimlipatam taluk	Dakamarri, Padmanabham, Bimlipatam and Chittivalasa.

Resolution—No. 598, dated 31st August 1897.

Submitted for the information of Government.

2. The rainfall of the fortnight was, on the average, much below what was expected. Good rain however fell in the interior of the district, the average being reduced by the deficient fall in the coast taluks. Fair rain has, however, been since received in the latter area. Away from the coast, crops were doing well, but nearer the sea, crops were fading for want of rain, and the area of cultivation was considerably restricted.

3. Ragi had been, and cumbu was being, harvested at the time of report, and though the outturn was not good, the new supply has had an appreciable effect on the market, the price of dry grains having fallen considerably. The price of rice, however,

is higher than in the great famine of 1877–78. The comparative position of prices is shown by the following figures :—

Rate.	Measures for a rupee.		
	Rice.	Ragi.	Cumbu.
Normal	15·0	28·0	30·0
Warning	12·0	21·0	22·5
Scarcity	9·0	14·0	15·0
Current	7·5	12·8	11·5
August 1892	10·0	18·4	16·9
Do. 1878	7·6	16·4	17·2

Imports continued in a considerable, though reduced, scale, while exports show a large increase.

4. The harvesting of these crops and the loss of them over considerable areas had very materially increased the supply of fodder, while pasture was generally ample. Except in Vizagapatam and parts of Anakápalle, the outlook for agricultural stock is therefore improving.

5. The condition of the people is reported generally good, though there was a considerable amount of sickness about. The numbers on works decreased by 17 per cent., and in gratuitous relief by nearly 50 per cent. The decreases are due partly to the improvement in the season in the inland taluks, and partly to the fall in the prices of dry grains, which has reduced the wages of labourers. The Collector hopes to close shortly all gratuitous relief in the inland taluks. In the coast taluks, prospects were not bright, and the Collector entertained but little prospect of closing relief at the end of the month, as he hoped at one time.

6. Fair work was done in the disposal of loans, but numerous applications for loans to buy cattle and fodder yet remain to be disposed of.

SEPTEMBER.

Fortnightly Narrative.

Recording Board's Proceedings submitting to Government, with remarks, — of the Vizagapatam district for the period ending 15th August 1897.

GOVERNMENT OF MADRAS.

REVENUE DEPARTMENT.

Read—the following Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), No. 598, dated 31st August 1897 :—

Read—the following Fortnightly Narrative for the Vizagapatam district during the period ending 15th of August 1897 :—

STATE OF THE COUNTRY.

Rainfall and water-supply—

District rainfall.	Actual rainfall.	Expected rainfall.
	INS.	INS.
In the fortnight	3·96	6·08
Up to the fortnight	19·37	26·64

Rainfall very deficient in the fortnight except in the Senior Assistant Collector's division and parts of Golgonda and Srungavarapukota. It is very poor in Bimlipatam, Vizagapatam, Vizianagram, Chípurupalle and Gajapatinagaram.

Water for drinking scarce in Vizagapatam. Water for irrigation sufficient in Salúru, Bobbili, Párvatípuram, Palkonda, parts of Viravilli, Srungavarapukota and Golgonda, but very deficient elsewhere. In many places tanks are empty and must be filled shortly, or crops will be ruined. Such rain as has fallen in the coast tracts is insufficient to affect the tanks.

Agricultural operations and condition of the standing crops.—Paddy being transplanted in Palkonda and the Senior Assistant's division and in Golgonda. In these taluks it is doing well. Transplantation has taken place on some lands in Sarvasiddhi and Anakápalle under river channels, but these are now dry and another fresh is badly wanted. Paddy in Vizianagram, Bimlipatam, Chípurupalle, Northern Anakápalle and parts of Gajapatinagaram is withering or failing for want of water in tanks. Dry crops are middling to good in most places, but withered in Vizagapatam, the coast of Bimlipatam and Chípurupalle, and Northern Anakápalle. Vizagapatam taluk is almost a desert. Early ragi is generally harvested ; outturn poor to middling.

Cumbu just beginning to be harvested ; outturn middling to fair, and in a few places good, in others bad, but a middling to fair crop on the whole.

Supply of fodder and pasture and condition of cattle.—Pasture ample, except in Vizagapatam and a portion of Anakápalle.

Fodder improving with harvest of early dry crops, and the cutting of withered crops for fodder.

Cattle good, except in Vizagapatam, and portions of Anakápalle.

General remarks on the previous subjects.—The improvement in the agricultural outlook reported last fortnight, has not been maintained. Except in Palkonda, the Senior Assistant's division, Golgonda and parts of Viravilli and Srungavarapukota, the prospects of paddy are very doubtful or very poor. Dry crop prospects generally pretty fair, but bad in the coast strip and very bad in Vizagapatam taluk. Accounts of Gajapatinagaram lately received are not very favourable either. What is required is some heavy tank-filling rain, and this has not been received except in the favoured Párvatípuram division and Golgonda. Freshes in the rivers in the south of the district are also badly needed.

FOOD-SUPPLIES AND THE STATE OF THE MARKETS.

Prices of principal food-grains at principal markets in the affected tracts, in seers of 80 tolas per rupee, for the period ending 15th of August 1897.

Private charity—Much contracted.

General remarks.—As stated the season has not maintained its improvement and in Vizagapatam, parts of Anakápalle, Bimlipatam and Chípurupalle it is absolutely bad. It can no longer be denied that this south-west monsoon is a partial failure and a complete one in some places. A good paddy crop can now hardly be expected in any event, and there is a great probability of a very bad one, though prospects are very favourable in four or five taluks. The imminent harvest of dry grains will probably cause a fall in prices sufficient to drive all the coolies off the works by lowering their wages to the vanishing point, but unless they go away for this reason I see but small chance of closing the works in the Vizagapatam taluk at least before the north-east monsoon. My intention to close relief by the end of this month has undergone a change. It certainly cannot be done, though it can be largely contracted by abolishing all kitchens and circles in the most favoured taluks. I am gradually doing this now. Poor as this south-west monsoon is, we may manage if it does not fail us altogether and if we get a good north-east in October. Prospects at present are by no means completely re-assuring.

is higher than in the great famine of 1877–78. The comparative position of prices is shown by the following figures :—

Rate.	Measures for a rupee.		
	Rice.	Ragi.	Cumbu.
Normal	15·0	28·0	30·0
Warning	12·0	21·0	22·5
Scarcity	9·0	14·0	15·0
Current	7·5	12·8	11·5
August 1892	10·0	18·4	16·9
Do. 1878	7·6	16·4	17·2

Imports continued in a considerable, though reduced, scale, while exports show a large increase.

4. The harvesting of these crops and the loss of them over considerable areas had very materially increased the supply of fodder, while pasture was generally ample. Except in Vizagapatam and parts of Anakápalle, the outlook for agricultural stock is therefore improving.

5. The condition of the people is reported generally good, though there was a considerable amount of sickness about. The numbers on works decreased by 17 per cent., and in gratuitous relief by nearly 50 per cent. The decreases are due partly to the improvement in the season in the inland taluks, and partly to the fall in the prices of dry grains, which has reduced the wages of labourers. The Collector hopes to close shortly all gratuitous relief in the inland taluks. In the coast taluks, prospects were not bright, and the Collector entertained but little prospect of closing relief at the end of the month, as he hoped at one time.

6. Fair work was done in the disposal of loans, but numerous applications for loans to buy cattle and fodder yet remain to be disposed of.
