Area affected—Condition and prospects of.—The area affected fell from 26,073 square miles to 22,963 square miles. There was a slight increase in Gódvári, but a considerable decrease in Ganjám and Vizagapatam. The rainfall at the close of the month was generally good, though it was light in some portions of the Deccan and Vizagapatam.

The condition of cattle continued poor in the Deccan districts, and considerable mortality was reported from parts. All anxiety on this score is now removed.

Prospects are now good in Ganjám, Vizagapatam (except Vizagapatam taluk) and Gódvári; fair in Cuddapah and parts of Kurnool, and moderate in the remainder of Kurnool, and in Bellary and Anantapur. Relief is expected to be closed in the Northern Circars about the end of September or beginning of October, and elsewhere a little later. A test work was opened in Kistna, but was soon closed.

2. *Nature of works.*—As hitherto, the work given consisted chiefly of road construction and repair.

3. *Operations under the Loans Acts.*—In addition to the numbers employed upon State relief works, about 7,092 persons are reported to have been employed on land improvement works, for which Rs. 69,636 were disbursed during the month, as shown in the subjoined table:—

* Figure incomplete.

4. *Wages* were calculated on prices varying from 8½ to 13 seers to the rupee. The majority of workers was in receipt of the B class wage. A great proportion of those on the C wage consisted of weavers.

5. *Gratuitous relief.*—The numbers on gratuitous relief fell to 136,060. The decrease, which was most marked in the Northern Circars and Bellary, was due to the greater strictness introduced with the improvement of the season.

6. *Prices.*—The prices of dry grain fell considerably in Vizagapatam, and rose slightly elsewhere, except in Ganjám and Cuddapah, where they remained fairly steady. Staple grains continued to be available only at rates considerably exceeding scarcity rates.

7. *Imports and Exports.*—The course of trade is shown by the subjoined figures:—

Districts.	Imports and exports by rail.			
	July.		August.	
	Imports.	Exports.	Imports.	Exports.
Ganjám	1. MDS.	1. MDS.	1. MDS.	1. MDS.

Cuddapah	40,041	46,645	24,833	24,278
	25,194	24,580	13,680	13,243

* Figures incomplete for July.

Gross imports were large in Ganjám, Vizagapatam and Bellary and moderate in Kurnool. In Anantapur and Cuddapah, the balance was about even. Much of the exports from Bellary and Anantapur consisted of Mysore grain. Exportation was fostered by high prices in Bombay.

8. *Condition of the people.*—The condition of the people was, on the whole, fair. Cholera continued, though with less intensity, in the Northern Circars, and was prevalent to a slight extent in the Deccan. The decrease in the numbers on relief which was most marked in Ganjám, Vizagapatam and Cuddapah was due to the improvement in the season, and increased strictness. The condition of jungle tribes in Bhadrachalam taluk of Gódvári district was critical, owing to the peculiar disposition of the people, and the shortness of supplies in the market. It was found necessary for Government to import grain into this area.

9. *Mortality.*—The following table shows the deaths in July 1897 and in the period, October—July 1896–97, and the average rates for such periods:—

Districts.	Number of deaths reported			
	During July		From October to July	
	1897.	Average.	1896–97.	Average.
Ganjám	7,392	2,096	29,075	19,511

Anantapur	2,188	1,874	20,417	22,392
Cuddapah				

* Not reported.

The increase in Ganjám during both periods was partly due to cholera and small-pox, and in Kurnool, during the month, partly to cholera. The cause of the increase in other districts is not yet known.

* Figures incomplete for July.

Gross imports were large in Ganjám, Vizagapatam and Bellary and moderate in Kurnool. In Anantapur and Cuddapah, the balance was about even. Much of the exports from Bellary and Anantapur consisted of Mysore grain. Exportation was fostered by high prices in Bombay.

8. *Condition of the people.*—The condition of the people was, on the whole, fair. Cholera continued, though with less intensity, in the Northern Circars, and was prevalent to a slight extent in the Deccan. The decrease in the numbers on relief which was most marked in Ganjám, Vizagapatam and Cuddapah was due to the improvement in the season, and increased strictness. The condition of jungle tribes in Bhadrachalam taluk of Gódvári district was critical, owing to the peculiar disposition of the people, and the shortness of supplies in the market. It was found necessary for Government to import grain into this area.

9. *Mortality.*—The following table shows the deaths in July 1897 and in the period, October—July 1896–97, and the average rates for such periods:—

Districts.	Number of deaths reported			
	During July		From October to July	
	1897.	Average.	1896–97.	Average.
Ganjám	7,392	2,096	29,075	19,511
Vizagapatam	5,650	3,346	30,826	28,545
Gódvári	2,361	1,597	13,357	14,860
Kurnool	3,066	2,347	16,859	16,210
Bellary	1,498	1,350	11,356	10,144
Anantapur	2,188	1,874	20,417	22,392
Cuddapah				

* Not reported.

The increase in Ganjám during both periods was partly due to cholera and small-pox, and in Kurnool, during the month, partly to cholera. The cause of the increase in other districts is not yet known.
