

Public Works (1897) Department.

G.O., No. 913 W

DATED 31. March 1897

[Despatch Abstract.]

Ex. Engr. Behagat
Objectionable Items: Explanation from the S.C. Engr.
of certain points noticed in the Statement of
in the accounts of the T.M. Circle for July
1896, with the ^{Ex. Engr.} Examiner's Office note thereon, Revenue.

P. W. ACCOUNTS.

18 FEB. 1897

No. _____

The sluice was obstructed and irrigation stopped. A coffer dam - was made of sand bags in the tank, a covering slab ^{and rubbish} removed. It was a difficult piece of work and the piece-worker rendered ready and prompt assistance. It will be seen from the items on the bill that there were none on which he could get profit, and I considered the remuneration given him for his trouble and agency fair and reasonable one.

I know of no rule to forbid
such

such a charge, and ^{Consider} it was only
a matter of opinion. My opinion
was over-ruled and the procedure
will, of course, not be repeated.

Contracts are often tendered
for at an advance or decrease
of so much per cent on the
estimated amount, and such
an item in a final bill would
amount to exactly the same
as the above case.

No 3990^W of 17 - February 1897

Forwarded to the Chief Engineer

Public Works Department with reference to his item

No 10 in C. O. No 3566 W dated 12 December 1896.

2. I consider the explanation
satisfactory, but rates are supposed
to include contractor's profit and the
Executive Engineer has been directed to make
them do so in future.
