JUNE.

Famine-relief operations.—Recording report of the Collector of Madura regarding measures adopted for starting — in case the south-west monsoon fails.

PROCEEDINGS OF THE BOARD OF REVENUE

(REVENUE SETTLEMENT, LAND RECORDS AND AGRICULTURE).

READ—the following letter from J. TWIGG, Esq., Collector of Madura, to the Secretary to the Commissioner of Revenue Settlement and Director of the Department of Land Records and Agriculture, dated Kodaikánal, 1st June 1897, Ref. on C. No. 2132-Genl.:—

With reference to the concluding portion of paragraph 3 of B.P., dated 10th March 1897, No. 352, I have the honour to report that detailed instructions were at once issued to Divisional Officers pointing out the factors to be taken into consideration in estimating the probability of scarcity as the result of an assumed failure of the south-west monsoon, and calling upon them to complete all preparations and forecast the needs of their divisions.

2. The preliminary reports called for for the purpose of this report are necessarily incomplete owing to the shortness of the time, and the fact that every one but the Head Assistant Collector is busy with jamabandi.

3. The result, however, is as follows:—

The district consists of six ayan taluks and two large zemindaris. It depends more on the north-east than on the south-west monsoon, and failure of the former can be made good by the latter. Heavy cultivation does not begin till August. The previous harvest was fair and so are the standing crops. In the district, as a whole, failure of the south-west monsoon will cause no distress calling for measures of relief.

4. To come to particulars, Madura, Tirumangalam, Mélúr, Palni and Periyákulam and the Palni Hills are each reported to be able to stand a failure of the south-west monsoon without calling for measures of relief. In Dindigul, the Sub-Collector believes that failure would cause distress in one firka, the numbers requiring relief on works amounting to about 8,000. Should prices rise to scarcity rates owing to exportation to the north, the area and numbers would be increased.

5. As for the Ramnad and Sivaganga zemindaris, the Head Assistant Collector who has just returned from leave has been only able at present to give me his personal impression gained during extensive tours in February, March and April that failure of the south-west monsoon will not cause distress.

6. The Dewan Trustee of Ramnad informs me that no part of the Ramnad zemindari can be said to be dependent on the south-west monsoon. The manager of the Sivaganga estate who will be able to give detailed and valuable information has not yet replied to my letter.

7. Further, more detailed reports are promised from the divisions, but it may be said that a failure of the south-west monsoon will cause no distress that cannot be readily dealt with and for relief of which the necessary officers can be provided within the district.

8. Meantime, the provision of sanctioned works ready for use is being attended to in Dindigul first and other parts afterwards.

9. I am in correspondence with the Public Works Department authorities on the question of tools and staff.

10. I request that any information available as to probable rise of prices in the north, which is likely to cause a corresponding rise here, may be afforded me from time to time.

READ—also the following letter from J. TWIGG, Esq., Collector of Madura, to the Secretary to the Commissioner of Revenue Settlement and Director of the Department of Land Records and Agriculture, dated Veerapandi, 10th June 1897, Ref. on C. No. 2132-Genl.:—

In continuation of this office, Ref. on Cur. No. 2132, dated 1st June 1897, I have the honour to state that the Acting Sub Collector has since explained that he has no reason to expect actual distress calling for measures of relief in any part of his division as a result of a failure of the south-west monsoon, and that what he meant was that the portion of Dindigul taluk referred to in paragraph 4 of my letter of 1st June would be the first to suffer. It is reported also by the Manager of the Sivaganga estate that there need be no apprehension of any distress in that estate unless the north-east monsoon should also fail. The history of all previous times of scarcity supports the view that there is no likelihood of a failure of the south-west monsoon this year rendering necessary any measures of relief in this district.

2. Steps are however being taken as desired by the Board to arrange the machinery by which relief would be administered in case of necessity, though no detailed enquiries are being made as to individuals who would be thrown on gratuitous relief in case of famine, as in the absence of any probability of scarcity this course would only be mischievous. Especial efforts are being made to get suitable relief works sanctioned, camps fixed, &c., in those parts which would first feel the touch of distress.

3. In paragraph 3 of my letter, No. 2132, dated 1st June 1897, please transpose the words former and latter.

READ—also the following letter from J. TWIGG, Esq., Collector of Madura, to the Secretary to the Commissioner of Revenue Settlement and Director of the Department of Land Records and Agriculture, dated Veerapandi, 10th June 1897, Cur. Dis. No. 16:—

With reference to Board's Proceedings, Mis. No 3113, dated 4th May 1897, I have the honour to state that, as a failure of the south-west monsoon would not render relief works necessary, the tools distributed to this district may be considered a sufficient supply for the present. In case of any general scarcity caused, for instance, by failure of the north-east monsoon, the supply would of course be entirely inadequate.

RESOLUTION—dated 18th June 1897, No. 452.

Famine-relief operations.—Recording reports of the Collector of Madura regarding measures adopted for starting — in case the south-west monsoon fails.

PROCEEDINGS OF THE BOARD OF REVENUE
(Revenue Settlement, Land Records and Agriculture).

Read—the following letter from J. TWIGG, Esq., Collector of Madura, to the Secretary to the Commissioner of Revenue Settlement and Director of the Department of Land Records and Agriculture, dated Kodaikánal, 1st June 1897, Ref. on C. No. 2132-Genl. :—

With reference to the concluding portion of paragraph 3 of B.P., dated 10th March 1897, No. 352, I have the honour to report that detailed instructions were at once issued to Divisional Officers pointing out the factors to be taken into consideration in estimating the probability of scarcity as the result of an assumed failure of the south-west monsoon, and calling upon them to complete all preparations and forecast the needs of their divisions.

2. The preliminary reports called for for the purpose of this report are necessarily incomplete owing to the shortness of the time, and the fact that every one but the Head Assistant Collector is busy with jamabandi.

3. The result, however, is as follows :—

The district consists of six ayan taluks and two large zemindaris. It depends more on the north-east than on the south-west monsoon, and failure of the former can be made good by the latter. Heavy cultivation does not begin till August. The previous harvest was fair and so are the standing crops. In the district, as a whole, failure of the south-west monsoon will cause no distress calling for measures of relief.

4. To come to particulars, Madura, Tirumangalam, Mélúr, Palni and Periyákulam and the Palni Hills are each reported to be able to stand a failure of the south-west monsoon without calling for measures of relief. In Dindigul, the Sub-Collector believes that failure would cause distress in one firka, the numbers requiring relief on works amounting to about 8,000. Should prices rise to scarcity rates owing to exportation to the north, the area and numbers would be increased.

5. As for the Ramnad and Sivaganga zemindaris, the Head Assistant Collector who has just returned from leave has heen only able at present to give me his personal impression gained during extensive tours in February, March and April that failure of the south-west monsoon will not cause distress.

6. The Dewan Trustee of Ramnad informs me that no part of the Ramnad zemindari can be said to be dependent on the south-west monsoon. The manager of the Sivaganga estate who will be able to give detailed and valuable information has not yet replied to my letter.

7. Further, more detailed reports are promised from the divisions, but it may be said that a failure of the south-west monsoon will cause no distress that cannot be readily dealt with and for relief of which the necessary officers can be provided within the district.

8. Meantime, the provision of sanctioned works ready for use is being attended to in Dindigul first and other parts afterwards.

9. I am in correspondence with the Public Works Department authorities on the question of tools and staff.

10. I request that any information available as to probable rise of prices in the north, which is likely to cause a corresponding rise here, may be afforded me from time to time.

Read—also the following letter from J. TWIGG, Esq., Collector of Madura, to the Secretary to the Commissioner of Revenue Settlement and Director of the Department of Land Records and Agriculture, dated Veerapandi, 10th June 1897, Ref. on C. No. 2132-Genl. :—

In continuation of this office, Ref. on Cur. No. 2132, dated 1st June 1897, I have the honour to state that the Acting Sub Collector has since explained that he has no reason to expect actual distress calling for measures of relief in any part of his division as a result of a failure of the south-west monsoon, and that what he meant was that the portion of Dindigul taluk referred to in paragraph 4 of my letter of 1st June would be the first to suffer. It is reported also by the Manager of the Sivaganga estate that there need be no apprehension of any distress in that estate unless the north-east monsoon should also fail. The history of all previous times of scarcity supports the view that there is no likelihood of a failure of the south-west monsoon this year rendering necessary any measures of relief in this district.

2. Steps are however being taken as desired by the Board to arrange the machinery by which relief would be administered in case of necessity, though no detailed enquiries are being made as to individuals who would be thrown on gratuitous relief in case of famine, as in the absence of any probability of scarcity this course would only be mischievous. Especial efforts are being made to get suitable relief works sanctioned, camps fixed, &c., in those parts which would first feel the touch of distress.

3. In paragraph 3 of my letter, No. 2132, dated 1st June 1897, please transpose the words former and latter.

Read—also the following letter from J. TWIGG, Esq., Collector of Madura, to the Secretary to the Commissioner of Revenue Settlement and Director of the Department of Land Records and Agriculture, dated Veerapandi, 10th June 1897, Cur. Dis. No. 16 :—

With reference to Board's Proceedings, Mis. No. 3113, dated 4th May 1897, I have the honour to state that, as a failure of the south-west monsoon would not render relief works necessary, the tools distributed to this district may be considered a sufficient supply for the present. In case of any general scarcity caused, for instance, by failure of the north-east monsoon, the supply would of course be entirely inadequate.
