Government House and Subsidiary Buildings at Ootacamund

Estimate amounting to Rs. 8,370 for improvements to —, sanctioned for immediate execution, and the Superintending Engineer, IV Circle, directed to propose a re-appropriation of funds to meet the cost of the work.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

Read—the following papers :—

From Major F. W. ROMILLY, D.S.O., Military Secretary to His Excellency the Governor, to the Secretary to Government, Public Works Department, dated Madras, 27th January 1897, No. 31.

I have the honour to forward herewith, duly approved, an estimate amounting to Rs. 8,370 for improvements to Government House and subsidiary buildings at Ootacamund, and to request that you will be good enough to obtain the sanction of Government thereto.

From the Executive Engineer, Coimbatore Division, to the Superintending Engineer, IV Circle, dated 1st June 1897, No. 2152.

With reference to the Chief Engineer's letter, No. 824 C., dated 9th February 1897, forwarded with your No. 92 C.I., dated the 12th idem, I have the honour to forward, for sanction, an estimate amounting to Rs. 8,370 for improvements to Government House, Ootacamund, and to offer the following explanations on the points noted in the above letter :—

(1) The detail estimate for providing electric bells is furnished in the estimate and the same was also furnished with the consolidated estimate forwarded for sanction with my No. 4195, dated 10th December 1896.

(2) The plan of the proposed new straw-shed is herein enclosed. It is a lean-to shed added against the walls of the existing straw and firewood shed with a light corrugated iron roof supported on post let into the ground $1\frac{1}{2}$ to 2 feet and did not require any foundation, the walls also being of corrugated iron. The work of the straw-shed has also been completed. The old straw-shed is now used for carriages.

(3) The soil at site of new Lavatory is 1 foot black earth on surface and the sub-soil is hard earth. The depth of foundation allowed, viz., 3 feet, is the same as that of main building of which it is an extension.

(4) Data for the rates entered in the estimate is herewith furnished with the estimate for the items referred to in the above letter.

2. The plans have been retained as the work is under progress as per your endorsement, No. 107 C.I., dated 19th February 1897, on Chief Engineer's No. 990 C., dated 17th February 1897.

No. 307 W.

Copy submitted to the Chief Engineer, Public Works Department, with reference to his memo. Nos. 824 C., and 990 C., dated 9th and 17th February 1897, respectively.

The detailed estimate for fixing electric bells which is in the file of estimates seems to have been unnoticed in the Chief Engineer's office.

(Signed) J. HANNAN,
Suptdg. Engineer, IV Circle.

8th June 1897.

Order—No. 2141 W., dated 6th August 1897.

The estimate amounting to Rs. 8,370 for improvements to Government House and subsidiary buildings at Ootacamund is sanctioned for immediate execution, and the Superintending Engineer will propose a re-appropriation of funds to meet the cost of the work.

2. This sanction has been registered as Provincial No. 37 W. of 1897–98 and classified as "Civil Buildings—Original Works."

Current No. 5784

Letter No. 307 W

Dated 8th June 1897.

From the Supg= Engr IV Circle.

NOTE BY TECHNICAL SECTION.

Name of work Improvements to Govt= House & Subsidiary buildings at Cotacamund_

amount of Estimate Rs= 8,370_

The Supg= Engr, IV Circle, resubmits the above Estimate for Sanction of Govt, with reference to Chief Engrs" Memorandum Nos" 824C & 990C, dated 9th & 17th" February 1897 respectively=

The following are the Explanations offered on the points noted in the above references (Please see Executive Engrs" letter No 2152 27 1st June/97)

(1) Detailed Estimate for fixing Electric Bells_

This Estimate is in the file of other Estimates_

Yes: but it is not clear how the rates have been arrived at. However, perhaps they may be accepted as they have, presumably, been obtained from some firms.

Remarks=

The total cost of this work

is

is, Rs. 745 — — Please Col. 4, last page of General abstract.

Rs. 143 — — including 10 Rs for contingency — 00 — Col. 10.

Rs. 200 — — 00 — — 00 — Col. 12.

Rs. 180 — — — — — — 00 — Col. 14.

Total Rs. 1268 — Rs. 1138 according to my figures. However this is immaterial, as the total amount of the estimate will not be affected.

(2) Plan of the proposed new Straw Shed now submitted.

Remarks.

The Retimate provides for 6 posts, 8 ft. long and 2 posts 10 ft long. If 7 ft is the above ground level as shown on plan, the former will be let into ground 1 ft. + the latter, 3 ft.

This will do, as the soil is now reported as hard below the first foot, though a minimum of 1'-6" in the former would have been better and according to para 2 of the Engineer Engineer's letter submitted by the S.E with his No. 307 W of 8-6-97 item is not less than 1'-6" in low ground.

(3) Soil. It is stated that the soil at site of new Lavatory is 1 ft, black earth on surface, & the subsoil, hard earth. Depth of foundation allowed is stated the 3 ft

* Ample, if not excessive, for necessity: but there is no plan.

(4) Data for rates, Submitted.

Remarks.

Checked & found correct, except Concrete, in which the item "Add for granite stone, Schedule item 28", Rs. 4 is not understood. The Rate of Rs. 9 (Schedule item 70) includes all Materials & Labor Complete. To this, should be added

added cartage of materials. This has been included in the data Submitted, also 50 per cent for work in Nilgiris as per note in the Schedule. The item Rs. 4, seems therefore to be a mistake. If that be so, the rate for Concrete will be only Rs. 25 + not Rs. 29 — —

The plans of the buildings are retained in the Executive Engineer's office as, it is stated, the work is in progress.

AL
16/6/97.

The higher rate makes a difference of only Rs. 10 in the item for which it may therefore be passed unnoticed.
