2. I reported to you in my No. 283 E / 24-11-97 that I should require funds to make leading channels from the various tanks supply channels to the high level sluices so that the water in the smaller tanks of Sangam Project can be utilized and the tank need not be kept as full as at present. As the Collector warned me as to famine relief works I had to return to head quarters and have only just commenced again to go over all the tanks to see the amount of work to be done
