G.O., No. 125025

DATED

17 May 98

[Despatch Abstract.]

Condition of Public Buildings: Directing with remarks that whenever Supts. Enquiries during their tours of inspection have occasion to remark on the condition of any public building they should forward an extract of their inspection notes concerning the building to the Senior Officer of the Department occupying that building in view of his taking such action as may be necessary.

Civil Works.

Read—the following papers:—

Inspection notes of J. HANNAN, Esq., Superintending Engineer, II Circle, for February 1898.

* * *
21st.—Inspected Taluk Cutcherry (at Kavali).

Old Native building built in Native Choultry style.—Low and dark. Little court inside intended for light and air, occupied by the treasury room. Accommodation quite inadequate especially as regards records; altogether about as bad a specimen of the cutcherry of the old style as I have seen. A new cutcherry badly required indeed. Treasury room not safe, people doing business have to come inside and treasury might be rushed. The following new buildings have been built in the compound; all crowded together: sub-jail, cook house, latrine, Sub-Registrar's office; and outside the compound a ryot's shed, but intended for a latrine. The materials of all these buildings including the stone which is cut-laterite could be utilized in a new cutcherry.

Memo. No. 28 D.

Copy of the last paragraph of inspection notes of the Superintending Engineer, II Circle, for February 1898, is forwarded to the Revenue Department for information.

18th April 1898,

(Signed) W. B. DEWINTON,
Ag. Secretary to Government.

OFFICE NOTE No. 42.

With reference to the endorsement from the Public Works Department, No. 28 D., dated 18th April 1898, forwarding an extract from the inspection notes of the Superintending Engineer, II Circle, regarding the condition of the Taluk Cutcherry building at Kavali, the undersigned has the honour to state that, in such matters, the proper course would be for the Superintending Engineer to send a copy of his report to the Collector who will initiate such action as may be necessary.

7th May 1898.

(Signed) G. S. FORBES,
Ag. Secy. to Government.

To the Secretary to Government, Public Works Department,

No. 1250 W., 17TH MAY 1898.

ORDER—No. 1250 W., dated 17th May 1898.

Communicated to Superintending Engineers for information and guidance.

2. Whenever Superintending Engineers, during their tours of inspection, have occasion to remark on the condition of any public building, they will forward an extract of their inspection notes concerning that building to the senior officer of the department occupying the building, in view to his taking such action as may be necessary.

Inspection notes of
J. H. Hagan Esq. Super.
inspecting the ground, 2nd
Circle for February 98.
Inspected new Salug
catchway north at Congole.
Completed and dopts and
Windows at site. Some
5000 bricks were used.
Featured by the picuwork
on the ground. Selected
separately by the Sub
Director. Some
then sent from the site
of which some were carted
to site. They have all been
rejected and are certain
ly very inferior bricks.

12 to 13 1/2

It is rather hard upon the
principle to have the
bricks left in his hands.
He should have been invited
to burn a small clump
of say 500 bricks in the
first instance for appraisal.
It shows great want of
consideration allowing
to burn such a large
quantity. It appears now
that good bricks cannot
be got at Congole. The stone
procurable is also satisfactory.
It is a sort of hard iron
stone. The basement
of the Cutlery should
be built with this stone.
When at Kavali I found
that very good building
limestone was procurable
within

UP
within half a mile of the
main railway station. The
main district court will
court there to be built with
this stone and I think may
will indeed. The railway
to Congole will be open
for several months. The stone
can be carried then there
by rail at a reasonable
cost. The Provincial Officer
should arrange accordingly
with the Engineer-in-Chief
who will probably rail
the stone at favourable
terms. When the cost is
ascertained, a revised
estimate should be sub-
mitted. The distance from
Congole to Kavali is
40 miles. At the rate
of

The extension should be

carried out on the pre-
sented design of roof. The
compound is very dirty
and no wood is attached.

cattle are kept in it.
Another detached building
in this compound is the
Magistrate's quarters.
The structure is very
poor. It is in a state of
disrepair and needs
repairing and
repainting. In my opinion.

Sub-Collector's Cutchery
in good order but doors
and windows, verandah
posts and roof timbers
require wood oiling.

The repainting and wood-
oiling of public buildings
seems to be very
generally neglected.
