GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Account.

READ—again the following papers:—

G.O., No. 783 W., dated 23rd March 1898.

Read—the following papers:—

From Captain W. M. ELLIS, R.E., Executive Engineer, Kistna Northern Division, to the Conservator of Forests, Northern Circle, dated 29th January 1898, No. 1874.

[Reference.—Board of Revenue Resolution, Forest Mis. No. 979, dated 27th September 1897.]

I have to inform you that I estimate my requirements of Gódávári teak for November next at 75 tons.

The specification is for round logs of good average quality, girth 34 inches and up averaging not less than 40 inches. Length 12 feet and up averaging not less than 14 feet.

2. In measuring, it is usual to deduct for holes in the log one-third the length of the whole which is ascertained by inserting a $\frac{1}{2}$ inch iron rod as a probe.

3. I would prefer delivery at Bezvada in the main canal to which place the timber could be rafted, but could arrange for inspection at Rajahmundry.

4. I would ask therefore—

(a) If you can supply.

(b) What rate per ton of 50 cubic feet you can supply at.

5. I would ask to be supplied with a quarterly list of timber and bamboos in stock the same as is supplied to the Ordnance Department, if such supply is not a matter of real inconvenience.

From A. W. PEET, Esq., Conservator of Forests, Northern Circle, to the Executive Engineer, Kistna Northern Division, dated 23rd February 1898, Dis. No. 456.

In answer to your No. 1874, dated 29th January 1898, I have the honour to say that on its receipt I sent it for the opinion of the District officer, Gódávári, who says that no departmental supply of timber can be undertaken at present and that all the timber required can be purchased from merchants at Rajahmundry. I concur with him and consider that it is practically useless to undertake any departmental contracts with our limited staff.
