PROCEEDINGS OF THE BOARD OF REVENUE.

(Separate Revenue)

Mis.No. 1892, dated 9th May 1898.

Resolution.

In Government Order No.260 W, dated 26th January 1897 communicated in Government Order Mis.No.707, Revenue, dated 8th February 1897 Government directed the Consulting Architect to carry out the construction of a light verandah of corrugated iron around the combustible shed on the Beach. The Collector of Sea Customs considers that the proposed verandah which was intended for storage of such articles as tar, pitch and acids will not, when finished, afford sufficient accommodation and that a separate shed will be much more suitable, as it is not ~~desirable~~ advisable to have leaky casks around such a building as a combustible shed. He therefore requests that Government in the Public Works Department may be moved to sanction the erection of an open corrugated iron roof --- shed 100 feet X 30 feet in lieu of the verandah already approved. As the owners of goods are charged ground-rent for their storage in the open yard the Collector holds that it is right that protection from weather should be given in return. It is a fact that at present owing to the want of shelter the loss to the importers of tar and pitch is heavy, as casks burst from exposure to the sun, and the contents are lost or injured.

2. The Board recommends the Collector's proposal with the request that orders be issued in the Public Works Department for the preparation of an estimate for the corrugated iron roof shed.

3. A sum of Rs.3500 is entered for the work in the current year's Preliminary issue of the Provincial Civil Works Budget
