Explanation of necessity for re-appropriation.

BELLARY DIVISION.

Rampur channel improvements.—No funds were assigned for this work in the budget. In Superintendent Engineer's No. 4161, dated 16th October 1897, a re-appropriation of Rs. 2,000 was made on account of this work. The expenditure up to 31st December 1897 amounts to Rs. 1,904 and there are already bills to the extent of about Rs. 1,100 on hand awaiting payment. It is expected that a further payment of above Rs. 1,000 will have to be made during the year.

A revised estimate for about Rs. 30,000 is under preparation and steps have been taken to have it submitted to Superintendent Engineer on a very early date. The sub-divisional officer has been asked to continue only such portions as cannot be conveniently postponed. The additional allotment applied for is absolutely necessary.

Roya channel—Excavating a new channel from 12th mile.—The estimate for this work for Rs. 4,530 is now before Government. In Superintendent Engineer's No. 4161, dated 16th October 1897, an appropriation of Rs. 1,200 was made, but the expenditure to end of December 1897 has gone to Rs. 1,339. The additional allotment is necessary to meet anticipated liabilities to end of year.

Apparazpet tank—Restoring surplus sluice.—In the preliminary budget for the current year, an allotment of Rs. 4,000 had been provided for this work, but this provision was omitted from the final issue, apparently, with reference to G.O., No. 250 I., dated 12th March 1897, in which it was sanctioned as a famine-relief work. The value of work done yet to be paid is about Rs. 1,500, but the extra allotment of Rs. 1,500 is applied for to adjust the outlay debited to famine, but which should properly have gone to debit of ordinary funds. If the adjustment is ignored for the present, the additional allotment required will be Rs. 1,500. The work has been ordered to be stopped, but it will have to be resumed next year.

Repairs.—In Superintendent Engineer's No. 4161, dated 16th October 1897, further grant under this head was promised. Judging from the progress of expenditure to 31st December 1897 (Rs. 30,197 against Rs. 30,000) and taking into consideration the extensive damages due to the late rains, the additional allotment is absolutely necessary.

NOTES.

Reference to P. W. D. Code.

Chapter XV, section vi, para. 199.

1. This form should be used by the Executive Engineer or the local Government in any of the following cases :—
 - (a).—When a grant, or an addition to an existing grant, is required for carrying on a sanctioned major work.
 - (b).—When a grant for a work is found to be in excess of requirements, and it is proposed to resign it, either wholly or in part.
 - (c).—When it is proposed to utilize the grant for one work upon some other.
2. Either of the columns for “Proposed new grant” or for “Proposed reduction,” or both, may be used as required.
3. If it happens that the grant already allowed has been reduced, the entry in the column “Existing grant for current year” would of course be the amount less such reduction.
4. In the case of Irrigation works, the entries in the column “Departmental and service head” should show distinctly whether the proposed re-appropriation is debitable to Capital or Revenue, and the entries in the column “Works” should be so arranged as to show the project to the Capital or Revenue account of which the charge is debitable, and the class of service to which the charge is debitable, thus :—

—PROJECT.

(1).—HEAD WORKS—

(B). Land

(K). Buildings

In cases of Productive public works, the fact of their being so should be noted against the entries.

5. It being of the utmost importance that early intimation of possible lapses, or of excesses, in outlay on works should be communicated to the Government, a close watch should be maintained on the progress of all works, and this form employed the moment the facts are sufficiently known.

6. Applications for re-appropriations which require the sanction of the Government of India should be submitted by the local Government in duplicate; applications by Executive Engineers should be submitted through the Superintending Engineers of their Circles.

Bellary Division.Rampus Channel Improvements.

No funds were assigned for this work in the budget.

In Suptg Engineer's No. 4161 dated 16.10.97, a reappropriation of Rs 2000 was made on account of this work. The expenditure up to 31.12.97 amounts to Rs 1904 and there are already bills to the extent of about Rs 1100 on hand awaiting payment. It is expected that a further payment of above Rs 1000 will have to be made during the year.

A revised estimate for about Rs 30000 is under preparation and steps have been taken to have it submitted to Suptg Engineer on a very early date. The Sub Divl Officer has been asked to continue only such portions as cannot be conveniently postponed. The additional allotment applied for is absolutely necessary.

Konga Channel. Excavating a new channel from 12" rule.

The estimate for this work for Rs 4580 is now before Government. In Suptg Engineer's No. 4161 dated 16.10.97 an appropriation of Rs 1200 was made but the expenditure to end of December 1897 has gone to Rs 1339. The additional allotment is necessary to meet anticipated liabilities to end of year.

Apparazpet Tank. Restoring surplus sluice.

In the preliminary budget for the current year, an allotment of Rs 4000 had been provided for this work but this provision was omitted from the final issue

issue, apparently with reference to G.O. No. 2508 dated 12.3.97 in which it was sanctioned as a famine relief work. The value of work done yet to be paid is about Rs 1500 but the extra allotment of Rs 1500 is applied for to adjust the outlay debited to famine but which should properly have gone to debit of ordinary funds. If the adjustment is ignored for the present, the additional allotment required will be Rs 1500. The work has been ordered to be stopped but it will have to be resumed next year.

Repairs.

In Superintending Engineer's No. 4161 dated 16.10.97 further grant under this head was promised judging from the progress of expenditure to 31.12.97 (Rs 30,197 against Rs 30,000) and taking into consideration the extensive damages due to the late rains, the additional allotment is absolutely necessary.

Kurnool Division

The amount is urgently required for paying work Establishment employed on the canal. Before the receipt of order restricting the expenditure the balance of grant available was utilized for the payment of work done by the piece workers.

The

The surrender is due to the estimates which provide for the reconstruction of surplus weirs & sluices not having yet been received sanctioned with levels & plans.

Cuddapah Division

Rs 28,000 is not required for the Chepand Project as the original application for funds was based on the supposition that the Project would be continued as an ordinary work soon after its closure as a relief work. The new Sub-Division to start the work is just formed with the necessary establishment & not more than Rs 10,000 (if so much) can be spent during the year.

Rs 10,000 is urgently required for completing the Sargol Project.
