READ—the following paper :—

From W. C. DEMORGAN, Esq., M.I.C.E., Superintending Engineer, I Circle, to the Chief Engineer for Irrigation, dated Dowlaishweram, 11th February 1898, No. 972 G.N.

I have the honour to state that the proprietrix of Tholtoda agharam, in the Ganjam district, put in a petition requesting permission to construct, at her own cost, a masonry dam across Wadada channel in place of an earthen bund put up every year for raising water for the irrigation of about 1,087 acres, of which 787 acres belong to Government villages and the remainder to the proprietrix.

2. The masonry dam would have been constructed from Government funds this year had the grant under 43 admitted of the outlay.

3. I have informed the Executive Engineer that there is no objection to the proprietrix being allowed to construct the masonry dam at her own expense on the distinct understanding that it is built according to the plan approved by this department and under supervision of the Public Works Department; that it becomes Government property after it has been built; and that its construction from her own funds confers no right of ownership on her; and that no work is to be done until the proprietrix has given declaration with the above conditions on proper stamp.

4. I am fully aware of the utility of the work, and request that my action may be approved and sanction of Government may be obtained under G.O., No. 331 I., dated 14th June 1890.

ORDER—No. 173 I., dated 5th March 1898.

The construction of the work referred to is sanctioned subject to the conditions specified in the foregoing letter.
