Note. This estimate has been submitted with

reference to para 3 of G.O. No 2284 dated 20th August 1897. In para 4 of his letter recorded with the above G.O. the collector of Tinnevely recommended the fencing of the foreshore as a most important work and suggested that the charge might be met from Port funds, but the Board of Revenue was of opinion that the work was very necessary in the interests of both Customs and Port revenue, and that the two departments should contribute equally to the erection of the and maintenance of the fence, vide para 2 of the Board's Resolution printed in the same G.O. In the latter view, the Presidency Port Officer concurs.

2 The technical details of the estimate are dealt with in the accompanying note.
