NOTES.

Reference to P. W. D. Code.

Chap. X, para. 82.

1. In order to facilitate the preparation, by the India office, of the estimates of expenditure on stores, an annual forecast of stores required from England, in this form, should be prepared by each branch of the Public Works Department and State Railway, so as to reach the Government of India in the Public Works Department on the 1st August of each year.

2. Separate estimates should be prepared of stores required for Imperial Services and for Provincial Services or Incorporated Local Funds, and they should be carefully framed on the basis of previous experience, modified to meet the known or probable requirements of the Service for the year which they may represent.

3. All articles of which the aggregate value purchased or received during the year does not exceed Rs. 1,000, should be grouped together under each class as shown in the form; the classification in the two lists in appendix O, Public Works Code, volume I, being followed as closely as possible.

4. In the case of stores required for the general and irrigation branches, the estimates should show clearly the heads of service and funds to which the amounts are chargeable in accordance with the number and classification of account heads, as may be laid down from time to time by the Public Works Department.

5. The amount should be given in English currency, so that there may be no misunderstanding as to the cost in sterling money.

6. In the case of estimates of stores submitted by railways, he probable requirements on capital account should first be entered, and then, separately, the probable requirements on revenue account.

7. In the columns for expenditure of the three preceding years, the total expenditure on English stores, whether incurred locally or through the agency of the Secretary of State, should be inserted.

Copy of a letter from H.A. Moss Esquire, General Superintendent, P.W. Stores, to the Superintending Engineer, 5 Circle, No. 100 S.E. 5 dated 25 July 1898:—

I have the honour to submit the annual estimate of English stores required for the official year 1899-1900.

It will be found from the memo given at the foot of the estimate that the average actual expenditure of the last three years is £ 13,400-1-7.

The annual indent for 1898-99 including supplemental was . . . . £ 19,567—

The estimate now submitted for 1899-00 is below the amount of 1898-99 and is a little over the average expenditure of the last three years . . . . £ 15,110—
