Report accompanying estimate for
levelling irrigation channels in the Udama
pet section for purposes of rechanneling.

Amount of estimate Rs 1150.

Reference. Divisional officer's No 3695 of 31st
October 1896, 486 of 15th February 1896 and 487 of 15th
February 1896.

The marginally noted channels have
been proposed to be rechannelled. The aggregate
length of channels is 160 miles
and the levels are required
all along the channels for
deciding the sill levels &c
for the purpose. Hence it is
now proposed to employ a
special surveyor to take the
necessary levels as the section
subordinate who has charge
of 3 taluks cannot solely
engage himself in this work

as it will be detrimental to the duties of the
section. The references have been pending

since February 1896 and hence early sanction
of the estimate is solicited so that the
reference might be disposed of at an early
date.

(Signed) K. Ramachandris

2nd July 1898

Overseer P.W.D.

Forwarded to the Executive Engineer for
early sanction. The services of a special
temporary establishment for taking necessary
level and surveys in order to dispose of
long standing references in which levels and
surveys enter and which owing to want of
subordinates during the past two years (due to
famine) have fallen to arrears and owing to
there being only one subordinate who is at
present in charge of 3 taluks and consequently
cannot be expected to spare much of his time
in the clearing up of these references. The
sanction for this estimate is urgently needed
in order that the references may be disposed
of as early as possible.

The high rates provided for surveyor
and lascars are necessary owing to most of
the work having to be carried out in feverish
and

and unhealthy localities.
