Read the following

From the Presidency Port Officer, Madras

No. 1799/276 G; dated 16th August 1898.

I have the honour to acquaint you, for the information of Government, that owing to a derangement in the clock-work of the machinery of the Light at Armagon, the apparatus is now being worked by hand until necessary repairs to a wheel and two pinions have been carried out at the Public Works Workshops, Madras. The flashing periods of the light will therefore be irregular during the time the apparatus is worked by hand, and I have telegraphed to the Port Officers of Calcutta, Bombay and Rangoon, to the Master Attendant, Colombo, and to the Port Officers on the Madras Coast to warn mariners in the matter. I would suggest that the fact be communicated

to

Govt Gr

by wire to the authorities at Pondicherry, Port Said and Aden.

2. In this connection I would mention that the clockwork above referred to has been in use for over 25 years, and it is highly desirable that it should be renewed as soon as possible. A new machine (clockwork) obtained from Home for the Armeghon Light is now in stored at Madras, and I submit for the approval of Government that, pending the alteration to the light proposed by Mr. Ashpitel, the new clockwork may be put up after issuing the necessary six months notice to mariners regarding the temporary extinction of the light for this purpose.

3. Early orders are requested.

4. I may add that the Superintendent of Works, Light House Dn., is about to start for Armeghon, and may possibly be able to fix the new clockwork without any interruption in the display of the light.

H. I. Form No. 1—1,000—21-4-98.

Order.

Order :- No. 710 Marine, Dated 24th Aug t 1898.

The proposal of the Presidency Port Officer that the Armeghon Light house should be fitted, as soon as possible, with the new clockwork obtained for the light, from home, is approved.
