Note by the Chief Engineer for Inspection.

x wide letter flaps E

The Executive Engineer in charge,
First Circle, forwards an estimate
of Rs. 620. for constructing a mason-
ry regulator below Umanachili
channel head across Accurada
branch, Gangai Muni river sys-
tem, in place of the existing earthen
dam, which is always found
very troublesome to maintain.
The estimate may be sanctioned.

Report to accompany the Estimate for Constructing
a Regulator below Ellamanchikuri Channel head
across Accurada Branch S. No. 24 Nagari-
Katakam Channel system

Amount of Estimate \$620^v

The Nagarikatakain Channel at its tail divides into the Ellamauchitei and the Accurasa branches, the former, a high level Channel irrigating 248 acres. Ordinary and low water times, all the water in the main Channel is drawn off towards the latter and it is customary to place an earthen bund across it, as otherwise the agent under the high level Channel will suffer. It is always found very troublesome to maintain this mud dam, and it is therefore proposed to construct a masonry regulator as per the design submitted herewith. The bed fall of the low level Channel necessitates a drop of 1' and ample waterway—equal to the existing width of the Channel allowed to pass off the flood which is very heavy in these parts. The work will be carried out in accordance with the Standard Specifications.
