ORDER

The Executive Engineer
Kistna Northern division
is authorized to transfer
to the Supt. of Works Light
House division, the surplus
English Portland Cement
in store at Baywatch,
at the stock rate of
Rs 11-2-4 per barrel, free
of workshop and
charges.

2. There is no objection
to the Supt. of works
using ~~the~~ ^{the} cement
at ~~unauthorized~~ ^{unauthorized} for
plastering & floors &
such like work.

p. 20)

Visiting Northern division
states that he has in
stock 300 barrels of
English Portland cement
more than he requires,
and because this cement
has come on to the
workshop stock, he
is unable to issue it
to funds other than Provincial,
except at an advance of
25% over the stock rate.
The sanction of Govt. is needed
to waive this centage charge.
The charge of 25% is
^{more particularly to articles}
applicable ~~to stock~~ made
up at the workshop,
& is intended to cover
storage & general charges,
& it need not be enforced
strictly in the case of
surplus stock issued for
use on works carried out
from Imperial & Local
funds. There is no objection
therefore to allowing Mr
Asquith to have the cement
he wants for light house
construction, at stock rates.

2 Asquith

letter, it appears that
the large surplus in the
Banyas workshop is
due to a mistake made
by the General Supt. P.
Stores.

The subject of the
2nd para of the draft
order above, is more
a matter for the Chief
Supt. than for Govt.,
to settle, but as Mr
Asquith has included
it in his ~~letter~~ letter,
it is mentioned in the
Go. to save time.

I am having experiments
made of the comparative
merits of English & made
cement, & the latter
has not up to date, come
well up to the ideal.
That is why I wish to
restrict its use as much
as possible until the
experiments are concluded.

F. W. ASHPITEL, Esq.,

~~Executive Engineer,~~
Superintendent of works
LIGHT-HOUSE DIVISION,
Egmore, Madras.

To

THE Secretary to Government
Public Works Department.

SIR,

With reference to your remark on my inspection notes for December on False Point Lighthouse, to the effect that, pending further experiments, no more Madras Cement must be used for important work I have the honor to inform you that the Superintendent of the Begwada Shops has a certain amount of English Port Cement in stock which was sent to him by mistake and which is available for transfer to this division. Under the existing rules I shall have to pay working charges at 25% because the cement is

the

the stock of the Beywada shops though it is only so through a mistake on the part of the Superintendent Public works Stores who despatched the cement to Beywada without an indent.

Under the circumstances I request that the workshop charges may be waived in this instance that early orders may be passed to enable me to convey the cement to False Point Dis before the closure of the Canals.

2) As there is no stock of English Portland cement at the Public works Stores I request permission to send Madras Cement to Manapand where it is only required for plastering the floors and such like work.

I request that very early orders may be issued I wish to utilize the S.S. Margarita to tow boat to Tuticorin and unless the cement is ready when the steamer arrives I shall

not

not be able to make use of her.

I have the honor to be

Sir

Your most obed^t servant,

W. Ashpitt
Superintendent of works
Light House

No

As you are aware from previous correspondence, I have now in stock some 600 barrels of English Portland cement. Of this about 300 barrels will be probably required in the next 2 years leaving a balance of 300 barrels. I have no storage room in which these can be kept. My stock rate is \$11-2-0. I think I can dispose of this surplus barrels to the Light House or if I am allowed to do so at this rate but the Executive Engineer Light House Division very properly declines to take them with an additional percentage added. I request that I be authorized to issue this surplus stock at full cost value without extra centage. If this is refused the result will probably be, either that the cement will eventually be sold as surplus for considerably less than this sum, or that Government will have

will have to build a store to accommodate a quantity of cement extra to requirements. Very early orders (by wire) are requested to enable me to get the cement off my hands before the canals close.
