BACK PAPERS.

FURTHER PAPERS.

Letter from J. C. Johnston, Esq., Executive Engineer,
Kernool Division, N^o 5676 dated 19th January 1898
to the Superintending Engineer, III Circle, Bellary.

I have the honour to report that the dismantling of the existing Talug leutcherry at Pattikonda, and the erection on its site of the new leutcherry, will not be begun in this Official year. The Sub Divisional Officer, Head Quarter, reports that the Peapully Dy: Collector requires to be provided with safe accommodation for the Treasury and prisoners in the building to be rented while the new leutcherry is being built. This will consist of an iron-barred Treasury room, and walled rooms with iron-barred doors and ventilators for the prisoners, the cost of which will probably be over Rs 500. As sanction of Government will be necessary before this Department can prepare the estimate, and more time will be taken up in obtaining sanction to the estimate and executing the work, it is probable that the leutcherry work will not be started before the end of the current official year. I am going to Pattikonda in a few days to see personally what can be done in the matter.

No 5686a of 21 January 1898

Copy forwarded to the Chief Engineer,

P. W. D.

P. W. Department. Under these circumstances there is no alternative but to surrender the grant ~~of \$5000~~ allotted to the work. Efforts were being made to utilize it.

Existing grant \$10000.
In addition to \$2000 transferred to the Navy &c

I have the honor to report that the design of the existing large building at Battersea, and the new building, will be begun in this official year. The Sub-Commissioner, Head Quarter, reports that the People's Palace, London, requires to be provided with safe accommodation for the Treasury and Finance in the building to be erected while the new building is being built. This will consist of an iron-banded Treasury room, and a small room with iron-banded doors and ventilation for the Finance. The cost of which will probably be over \$500. As a section of Government will be necessary before this Department can prepare the estimate, and more time will be taken up in obtaining sanction to the estimate and executing the work, it is probable that the building work will not be started before the end of the current official year. I am going to Battersea in a few days to see personally what can be done in the matter.
