Contribution Work

Contribution Work

The execution by the Public Works Department of the — of providing screw-gearing shutters to No. III Varugal sluice, on the right bank of Kodagon channel, Tinnevely district, sanctioned.

PUBLIC WORKS DEPARTMENT.

READ—the following paper :—

I have the honour to request that sanction of Government may be obtained for executing as a contribution work the accompanying estimate, amounting to Rs. 170, or Rs. 211 including charges for establishment and tools and plant, for providing screw-gearing shutters to No. 111, Varugal sluice, situated on the right bank of Kodagon channel at the place where the channel enters Imperial No. 190, Kandiaperi tank, in the Tinnevely taluk.

2. The name of the sluice can be found in page 4 of the component list of works for which a continuous record of expenditure is kept under G.O., No. 541 L., dated 17th September 1879, under 4. Ariyanayagipuram anicut, Tambraparni river. The sluice was built by the municipality in 1871, and the object of the proposed expenditure is to limit the supply of water to the town and to avoid wastage.

3. The Executive Engineer reports that the amount of Rs. 211 will be recovered from the municipality before the work is put in hand.

REPORT accompanying Estimate for providing Screw-gearing shutters to Varugal sluice No. 111, Kodagon Channel, to supply Tinnevely Town.

The Varugal sluice No. 111, Kodagon channel, supplies the Tinnevely town, chiefly to flush the drains and watering the roads. This department made complaint to the effect that the water is unnecessarily wasted away and the vent of the sluice should therefore be reduced. The municipality, in order to guard against the complaint, proposed to have the supply regulated by means of screw-gearing shutters instead of reducing the size of the vent. This estimate provides for what is necessary for the purpose. The work will be done at the cost of the municipality (*vide* Chairman's letter, No. 503, dated 25th January 1898, herein enclosed).

12th February 1898. (Signed) N. KUMARASAWMI ACHARI,
Supervisor.

The sluice was constructed by the municipality in 1871 (*vide* Municipal Chairman's letter, No. 40, dated 7th May 1897, with an enclosure herewith attached).

5th April 1898. (Signed) S. GOPALAKRISHNA AIYAR,
Executive Engineer.

From the Chairman, Municipal Council, Tinnevely, to the Executive Engineer, Tinnevely
Division, dated 7th May 1897, No. 40.

With reference to your letter, No. 1213, dated 27th April 1895, I have the honour to state that the Kandiaperi sluice was constructed by this municipality in 1871 for bringing fresh water to the town of Tinnevely, and a copy of the resolution of the council on the matter is also enclosed.

I request you will be good enough to have the screw-gearing shutters put up at a very early date.

(1) Resolved that the estimate for Rs. 380 to construct a sluice in the Kandiaperi channel for supplying fresh water to the town be sanctioned and that the work be performed; that a contract be entered into with Nanimiah Sahib of Palameotta for supplying for the above work 20½ cubic yards of new cutstones for pavement and covering to be conveyed to the spot and fitted out at the rate of Rs. 6-8-0 per cubic yards.

From the Chairman, Municipal Council, Tinnevely, to the Executive Engineer, Tinnevely
Division, dated 25th January 1898, No. 503.

In continuation of this office letters, No. 50, dated 12th April 1897, No. 36, dated 29th April 1897, and No. 40, dated 7th May 1897, I have the honour to request that you will be good enough to arrange for providing screw-gearing shutters to the sluice * in Kandiaperi tank, south of the tollgate No. 3. The cost will be paid on receipt of the bill. In the last year, you communicated to this office in reply to the letters above quoted that it was too late for commencing and completing the work on the ground that fresh water will be shortly coming in.

No. 354.

Forwarded to the Supervisor, Tinnevely, for the required estimate called for in this office No. 2281, dated 30th June 1897. The estimate must be accompanied with an accurate plan of the sluice.

S. GOPALAKRISHNA AIYAR.
