FURTHER PAPERS.

Letter from S. Gopalakrishna Iyer Esq.
Executive Engineer, Irrigation Division
to the Superintending Engineer, 6th Circle
dated 14th August 1898, No. 2993. —

Encls: 3.

With reference to your No. $\frac{2147N}{23-3-98}$
I have the honor to request the favor
of your instructions regarding the
nature of roof to be provided for,
to the Sub. Court and the building
occupied by the English Correspond-
-ence department of the Collector's Office.

2. The District Judge wants a terraced roof for the Sub. Court and the Board of Revenue propose the same for the building occupied by the Collector's Office, but in the G.O. no 455, M.S. dated 8th March 1898 it is said that the whole roof should be remodelled and tiled.

3. I herewith send three plans. The ink lines in plan A marked in blue show the building occupied by the Sub. Court and its roof as they at present are. Plan B shows the proposed improvements to the roof.

Plan. C shows the building occu-
-pied by the Collector's office the
hatched lines showing the proposed
terraced roof and other improvements
and the dotted lines the existing
tiled roof.

4. The present tiled roof is composed of palm-leaf rafters and flat and pan tiles. The rafters are all very old and most of them have sagged. As the side rooms of the Sub Court building are terraced, I consider the middle hall where the Court is held may also be terraced as desired by the District Judge and as shown in plan B. Then the building occupied by the Collector's Office must also be terraced. If you approve of these terraced roofs, I wish to know the width and the nature of

5. I examined the foundation of one of the pillars. It is 6'-2½" deep below floor level and has several footings. A terraced roof may therefore be safely constructed.

I have the honor to forward herewith for your orders copy of a letter No 2993 dated 14th August 1898 from the Executive Engineer, Innervelly Division together with 3 plans. The question is shall the roof, the buildings for which estimates were called for in G.O. No 742 W dated 18th March 1898 be terraced or tiled.

1825: I shou^d have no hesitation
in directing that terracing should
be used, but that in the order no.

113

Communicated with the above quoted G.O. it is directed that tiling be used. I am not aware if there was any special reason for this order. The Executive Engineer, the Collector of Tinnevely and the Board of Revenue recommended terracing, and if

there is no good reason to the contrary I recommend that in remodeling the roof, terracing be used.

d/9th September 1898.
(C.No. 6297 of 98).

NOTE.

The Superintending Engineer, VI
Circle, having recommended that, if
there is no good reason to the con-
trary, terracing, instead of tiling
as directed in G.O. No. 1155, Revenue,
d/8th March 1898, be used in remodel-
ling the roof of the building occu-
pied by the Sub-Court and the English
correspondence Branch of the Collec-
tor's Office, Tinnevelly, the Public
Works Dept. enquires whether there
was any special reason for directing
that the roof should be tiled. The
circumstances under which this order was
passed were as under.

2. Having learnt that an estimate
was under preparation for terracing
the roof of the Sub-Court at Tinne-
velly, which was located in the same
building as the English correspond-

correspondence Branch of the Collector's Office, the Collector of Tinnevely reported in his letter Dis.No.1844,d/ 17th September 1897 that the roof of ~~the whole building was~~ *the whole building was* ~~no portion of the building occupied~~ *shaded by the Executive* ~~by the English Correspondence Branch~~ *by the English Correspondence Branch* ~~Enquiries made~~ *Enquiries made* of his Office was in a rotten state and requested that orders may be issued for the preparation of an estimate for terracing this portion also and for the construction of pucca verandah around. The Board of Revenue supported the Collector's proposals. An Endorsement transferring the papers to the Public Works Dept. for the issue of the necessary orders was accordingly put up in this Dept. and forwarded to the P.W.Dept. for concurrence or remarks. The Chief Engineer thereupon noted - "I concur, except that terraced roofs are becoming, I hope, obsolete. It would be better to remodel the whole roof and tile it". With the concurrence of the Judicial Dept., an order directing the remodelling of the roof and ~~as proposed~~ *as proposed*

by the Chief Engineer was passed and issued.

3. From para 2 of the Executive Engineer's letter dated 14th August 1898 forwarded by the Superintending Engineer, it appears that the District Judge recommends a terraced roof for the Sub-Court. As the side rooms are terraced, the Executive Engineer considers that the middle room where the Sub-Court is held ~~may~~ *may* also be terraced and that if this is done the portion of the building occupied by the Collector's Office should also be terraced. He states that he examined the foundation of one of the pillars and found it to be 6' - 2½" deep below floor level and to have several rootings and that a terraced roof may therefore be safely constructed.
