READ the following:—

Letter from the Supt. Infr., II binche, N^o 160 c d 14.1.99
 office Note from the Examiner, P.W. Accts., N^o 396 $\frac{B}{A}$
 d 6.2.99.

Letter from the Supt. Ingr., II Circle, N^o 91 Ex d 22.3.99
Office Note from the Examiner, P.W. Accts., N^o 1020 $\frac{B}{A}$ d 29.3.99

Circulated to H. H. the Governor

ORDER.

ORDER. No. 1219 W 255-29

The statement is approved.

2. The reduced rent of Rs 92 will be charged so long as office accommodation is provided in the Supt. Engineer's bungalow at Bez-wada for the subordinates employed in the preparation of plans & estimates for irrigation projects in the Nellore Division.

To
The Sept. Ingr., II Circle
" Exam., P. W. Accts.

APK

APW
11/4/99
Pur. 3.4.99.

Note - The Supt. Ingr., II
Circle, claims a reduction
of rent for his bungalow at
Begwada as two rooms in
the

the building have been set apart for providing office accommodation for the subordinates engaged in the preparation of plans and estimates for irrigation projects in the Nellore Division. With reference to Vol I, Chap X, para 28, rule 1 (g), of the P. W. Code, a data statement has been obtained showing the capital cost, rent chargeable etc. for the portion occupied as a residence separately from that of the portion occupied as an office. The rent of the whole building is Rs 118, & that of the portion occupied as an office calculated under the rules is Rs 26, so that the reduced rent to be charged to the Supty. Engr. is Rs 92.

The Supty. Engr. reports that there is no suitable house in the bazaar or elsewhere in the place which could be occupied as an office at less rent.

There is no objection to

adapting
to the Supty. Engr. proposal & the reduced rent of Rs 92 may be charged so long as office accommodation is provided in the bungalow.

J. Hannan Esquire,

SUPERINTENDING ENGINEER,

II CIRCLE,

To

THE

Chief Engineer
Public Works Department.

SIR,

Enclosures. Nil

There are now four irrigation projects in the Bellare District the investigations and field work of which have been completed and for which plans and estimates have to be prepared - The projects are

1. The Mopand Project This is one of Mr. Lessner's projects about which I have already fully reported to the Chief Engineer for irrigation and recommended that it should be worked out. It is a project for irrigating at least 7000 acres. The three following projects were investigated under Mr. Wickham's orders. As they have not yet been reported on I will give a brief description of them.

Tonnaleru Project The project consists of the construction of a reservoir to be filled by an Aricut across the Gundasaleru a tributary

Chagur

24

728

of the Paleru with a catchment Basin of 32 sq. miles. The Anicut a low one will be founded on soft rock. The reservoir if filled only once will store sufficient water for 1000 acres. The length of the proposed bund will be about $4\frac{1}{2}$ miles and average height 13 ft. Suitable land for wet cultivation immediately under the tank. Area swamped in the bed of tank 500 acres of which 200 is bed of abandoned tank & for this latter no compensation will have to be paid. It will make a good famine project. The work is in the Kandukur Taluk 2 miles west of Ponnalur.

Hajipuram Project in the Kandukur Taluk.

This project is similar to the above. A reservoir to be constructed supplied by a weir across the Domaterru. This river has a Catchment Basin above site of weir of 100 sq. miles. The capacity of the proposed tank if filled only once will be sufficient for 1500 acres. The length of the bund will be about $3\frac{1}{2}$ miles and average height about 12 feet. Area swamped in bed of tank about 1500 acres but as it is poor land, the compensation will not be probably more than Rs 15000. It will make a good famine work.

Hajipuram Project

Pallatipalli Project also in the Kandukur Taluk. consists of a masonry dam across the Paleru. The dam will be 50 ft above deep bed of river. It will be founded on hard black basaltic sheet rock continuous for a length of 1900 ft across river. The surplus to go over dam. Flanks of

dam to be earthen bunds. The catchment Basin of river at site of dam is 350 sq. miles. Taking a duty of only 20 ares to the sq. mile of catchment Basin it will irrigate 7000 acres. Area swamped will be 3000 acres all except 300 acres is waste land. The compensation for this 300 will not probably exceed Rs 30,000.

The draw back to this project is that there is no agency immediately under the tank. The supply channel will have to be dug through hard soil for a length of 10 miles through Zemindari land to reach suitable irrigable Government land. Nevertheless I consider the project is worth working out. I propose having the above projects worked out under my personal supervision at Puzunda. It will take about 3 months to prepare the plans and estimates. I propose employing Mr. Sreenivasan Iyengar and Sub Engineer Mr. Rajagopal Iyengar with two overseers who are fair draftsmen and who have all been employed on the ^{field} famine work to prepare the plans and estimates.

There is absolutely no office accommodation either in my own or in the Kristna Eastern or Kristna Northern Division offices for these men so, I propose to give up two rooms of my bungalow for the purpose. If you approve of my proposals I request that you will sanction a reduction of my rent proportionate to the accommodation

provided. The bungalow consists of 6 rooms —
(excluding bath and dressing rooms). So the reduction
in my rent will be $\frac{118}{3} = 39$ rupees.

I have the honor to be
Sir,
your most obedient servant,
H. Annam
Superintending Engineer

No. 396 $\frac{B}{A}$ dated 6th February 1899.
To
W.

There is no objection to the
Superintending Engineer's (2nd circle) request
regarding reduction of rent being sanctioned
but the amount should be determined in
accordance with code I, IX para 28, rule
X clause

Clause (g) with reference to the Capital
value of the portion of the building --
occupied by the office, and not with --
reference to the number of rooms occupied.

2. The Executive Engineer Kistna --
Eastern Division who is in charge of the
building should accordingly submit, for --
approval of Government, a Data Statement
showing the Capital cost, rent chargeable
etc of the portion occupied as a residence
separately from that of the portion occu-
pied as an office.
