PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following paper:—

From the Surgeon-General, Madras, No. T 8/151, dated 27th April 1899:—

I have the honour to state that the Superintendent, Lunatic Asylum, Vizagapatam, reports that in 1895, the single rooms for females were found cracked in several places and on a requisition to the Public Works Department, the Executive Engineer reported the buildings to be unsafe and unfit for use.

2. When I inspected the asylum in 1897, I suggested that it would be desirable to ascertain if they could not be permanently repaired and made safe. The Executive Engineer who was consulted on the subject reports that to remedy the defects would probably cost more than a new building and would entail unsightly additions which would in all probability never obviate the occurrence of cracks.

3. As the Superintendent states that at present there are no single rooms for female insanes and they have to be treated in rooms adjoining the male insanes or in rooms round the hospital which are not intended for the purpose, I request that the Public Works Department may be instructed to construct urgently three single rooms in one row for female insanes.
