GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Establishment.

READ—the following paper:—

From W. C. DeMORGAN, Esq., M.I.C.E., Superintending Engineer, I Circle, to the Chief Engineer for Irrigation, dated Waltair, 15th October 1898, No. 1533 G.D.

With reference to G.O., No. 590 I., dated 3rd August 1898, I have the honour to submit two proposition statements—one for the Executive, and the other for the Subordinate establishment, required for the three delta divisions of the Gódávári for the proper working of the Conservancy Act.

2. From the wording of the Act, I gather that it includes—

- (a) The training of the river.
- (b) The regulation of all that goes on within the area defined.
- (c) Keeping the surveys of the river-bed up to date.
- (d) Protection of the river banks.
- (e) Prevention of irregularities within the bed, such as unauthorized planting of crops and nanel, interference with nanel planted for training purposes, &c.

3. If I am correct in my interpretation, it is obvious that the present staff of the divisions is inadequate to carry out the new duties and an increase in the establishment is imperative.

4. The respective charges in the divisions are as follows :—

Góðávari Eastern—

Both banks of Gowtami-Górávari above anicut	...	...	...	MILE. 48·5
---	-----	-----	-----	---------------

Góðávari Central—

Both banks of Gowtami-Gódávári below anicut and the Vaintyam-							
Gódávári	...	..	...	..	...	...	... 118·25

Gódávari Western—

Both banks of Vasista-Gódávári below anicut	...	...	...	95
---	-----	-----	-----	----

5. The length of the charges in the Gódávári Western and Central divisions are thus much in excess of that in the Gódávári Eastern. I would therefore propose that each of the former should be constituted a separate sub-division in charge of a permanent Upper Subordinate by choice a Supervisor, with one temporary overseer under him.

6. The smaller charge in the Górávari Eastern division may be placed under an overseer, and form part of the Rajahmundry sub-division.

7. The river charts are old, and need thorough revision, practically in many cases an entirely new survey must be made; a complete and accurate register of holdings must also be prepared. For this purpose, I suggest that two temporary surveyors on Rs. 80 should be sanctioned for the Central and Western divisions, and one for the Eastern division.

8. Two Conservancy Inspectors are proposed for the Central and Western divisions, and one for the Eastern division. It will be the duty of these men to continually travel up and down the river banks, and report all cases of unauthorized planting, cultivation, encroachment, &c. From November to May, they will assist the surveyor in revising the river charts and preparing registers.

9. Before framing the proposition statement, I consulted the Executive Engineers of divisions as to their requirements. Those of the Central and Eastern divisions were, I consider, in excess of what is necessary. Those of the Western division very much below. I have therefore reduced the former and increased the latter to what I consider a reasonable scale.

10. If my proposals are approved, and after the establishment is properly organised and in working order, the desirability of a very light draft steam launch *below* the ancient might be considered. At present it takes the best part of a day to visit one lanka, with the aid of a launch two or three might easily be inspected.

ENCLOSURE.

(Signed) J. E. LACEY,
Dy. Examiner, Public Works Accounts.

12th January 1899.

Forwarded to the Chief Engineer, Public Works Department, with the remark that the constitution of new sub-divisions with the establishments proposed seems necessary.

(Signed) F. J. WILSON,
for Chief Engineer for Irrigation.

27th October 1898.

Office-note from the Examiner, Public Works Accounts, dated 19th November 1898, No. 3937/B.E.

Returned with the following remarks.

2. This office is not in a position to check "Present scale" as regards Engineer and Upper Subordinate Establishment as there is no special scale for these classes of establishment by divisions, the audit being conducted on a general scale for the whole Presidency.

3. As regards the statement for the river conservancy establishment, the lump sums entered under Permanent establishment are also not susceptible of check, and the Superintending Engineer might be asked to furnish details of the establishment showing how the amounts have, in each case, been arrived at. The details referred to in the statement as having been communicated with my letter No. 1101 A.E., dated 9th September 1898, refer to a scale of establishment sanctioned by divisions under "Lower subordinate" and "Office" establishments only. As regards "Water regulations," "Navigation" and "River conservancy" establishments which fall under the head "Petty," the scale has been sanctioned for the Gódvári delta as a whole, and the present seems a very desirable opportunity for distributing this establishment by divisions, and it will materially facilitate audit also.

4. The present scale as regards temporary establishment is correct.

From W. C. DEMORGAN, Esq., M.I.C.E., Executive Engineer in charge, I Circle, to the Chief Engineer, Public Works Department, dated Russellkonda, 8th December 1898, No. C. 290.

Referring to your memo. No. 5285 C. of 24th November 1898, I have the honour to give as below details for the lump sums entered against permanent establishment in the proposition statement for the River Conservancy establishment submitted with this office letter No. 1533 G.D. of 15th October 1898.

GODAVARI EASTERN DIVISION.

Permanent Establishment.

Office.

	Rs.	
1 Clerk, III class, 2nd grade	Rs. 60—4—80	75

2. The above totals do not include overseers' clerks since the Examiner of Public Works Accounts has excluded them from the scale, communicated by him with his letter No. 1101 A.E. of 19th September 1898. Besides, orders of Government on the question raised in this office No. 626 G.L. of 3rd October 1898, whether overseers' clerks should be considered supernumerary or belong to a fixed scale are awaited.

3. No details for temporary establishment are now given as the Examiner, in his office-note embodied with the memorandum under reply, says that the totals given against the present scale under that establishment is correct.

Office-note from the Examiner, Public Works Accounts, dated 16th January 1899, No. 162 B.E.

Verified and returned with the following remarks:—

(1) The rate of pay of the peon employed in the Public Works Workshop establishment of the Gódavari Eastern division is under reference with the Secretary to Government, Public Works Department — *vide* paragraph 1 (2) of this office-note No. 1272 A.E., dated 28th October 1898. Until the higher rate is sanctioned, total can only be taken to be Rs. 1,083 and not Rs. 1,085 as entered by Superintending Engineer, I Circle.

(2) The rates of pay at present drawn by sub-overseers are entered instead of their financial value. The necessary corrections have been made.

(3) Quotation of G.O., No. 2362 W., dated 12th September 1898, against the establishments of Gódavari Central and Gódavari Western divisions is incorrect, as the Government Order in question relates only to Gódavari Eastern division (Workshop establishment).

(4) It is pointed out that the numerical strength of the permanent establishment of the Gódavari Central division shown in column 4 of the proposition statement as per details given in Superintending Engineer's letter and found correct is 23 and not 24 as entered in the proposition statement.

(5) The total temporary establishment sanctioned for 1898-99 has now been entered. It would be well in future if separate proposition statements were submitted for temporary establishment and that this establishment be not mixed up with permanent establishment.

(6) Enclosures are returned.

No. 1368 W., 30TH MAY 1899.

ORDER—No. 1368 W., dated 30th May 1899.

With the first of his letters read above, the Superintending Engineer, I Circle, submits two proposition statements—one for the Executive, and the other for the Subordinate establishment, required for the proper working of the River Conservancy Act in the three delta divisions of the Godavari district.

2. The entertainment of three temporary overseers, on Rs. 60 each per mensem, for executive work is sanctioned. The Chief Engineer, Public Works Department, will nominate the men and post them to the circle as early as possible.

3. The subordinate establishment detailed in the statement submitted by the Superintending Engineer with his No. 1533 G.D., dated 15th October 1898, is also sanctioned.

4. The question raised in paragraph 10 of the Superintending Engineer's first letter may be submitted for consideration after the expiry of a year.

5. With reference to the concluding portion of the Examiner's office-note No. 3937 B.E., dated 19th November 1898, the Superintending Engineer will submit a statement showing, by divisions, the existing sanctioned establishment of the Godavari delta under "Water regulation," "Navigation" and "River conservancy."

6. The attention of the Superintending Engineer is drawn to the remarks made in the Examiner's office-note, No. 162 B.E., dated 16th January 1899.

7. The sanction accorded in paragraphs 2 and 3 of these Proceedings has been registered as Provincial No. 13 W. of 1899-1900, and classified as Establishment.

(True Extract.)

(Signed) W. B. DEWINTON,
Secretary to Government.

From

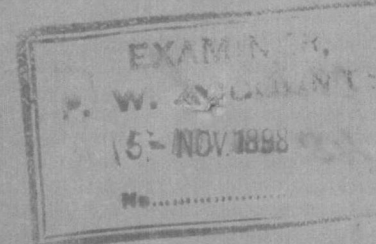

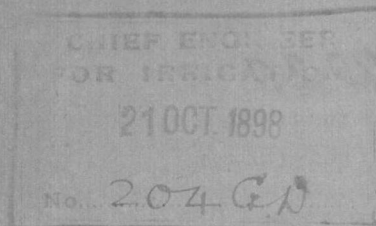

Enclosures Two

W. De Morgan Esq. M.I.C.E.
Suptg Engineer Ist Circle

The Chief Engineer for Irrigation
Nadra

To

Sir,

With reference to G.O. no. 590, 3.8.98
I have the honour to submit two proposition
Statements one for the Executive and the
other for the Subordinate Establishment
required for the 3 Delta divisions of
the Godavari for the proper working
of the Conservancy Act.

2.

From the wording of the Act, I
gather that it includes

- (A) The training of the River
- (B) The regulation of all that goes on within the area defined.
- (C) Keeping the Survey of the River bed up to date.
- (D) Protection of the River bank.
- (E) Prevention of irregularities within the bed, such as unauthorized planting of crops and namb, interference with namb planted for training purposes &c &c.

3.

If I am correct in my interpretation, it is obvious that the present
Staff

In a summary
of work done
in the Kistna

please see P.W.
No. 1383W of

1076195 the last
date in this file.

10/11/98

10/11/98

10/11/98

10/11/98

10/11/98

10/11/98

10/11/98

10/11/98

10/11/98

Staff of the divisions is inadequate to carry out the new duties and an increase in the Establishment is imperative.

4. The respective Charges in the divisions are as follow: -

Godavari Eastern.

Both Banks of Goutami Godavari above Anicut Miles 48.5.

Godavari Central.

Both banks of Goutami Godavari below Anicut to the Vainitya Godavari 118.25.

Godavari Western.

Both banks of Vasishta Godavari ^{below} Anicut 25

5. The length of the charges in the Godavari Western and Central divisions are thus much in excess of that in the Godavari Eastern. I would therefore propose That each of the former should be constituted a separate subdivision in charge of a permanent Upper Subordinate by choice a Supervisor, with one temporary overseer under him.

6. The smaller charge in the Godavari Eastern Division may be placed under an Overseer, and form part of the Rajahmundry Sub division.

7. The River Charts are old, and need thorough revision, practically in many cases an entirely new Survey must be made. A Complete and accurate register of holdings

The Survey was completed in 1887 and approved in 1888. The charts were approved by Govt in 1888. The Survey was completed in 1887 and approved in 1888. The charts were approved by Govt in 1888.

holdings must also be prepared. For this purpose, I suggest that 2 temporary Surveyors on Rs 80 should be sanctioned for the Central and Western divisions, and one for the Eastern division.

8. Two Conservancy inspectors are proposed for the Central and Western divisions, and one for the Eastern Division. It will be the duty of these men to continually travel up and down the River banks, and report all cases of unauthorized planting, Cultivation, encroachment &c. From November to May, they will assist the Surveyor in revising the River Charts, and preparing registers.

9. Before framing the proposition Statement, I consulted the Executive Engr of divisions as to their requirements. Those of the Central and Eastern divisions were I consider in excess of what is necessary. Those of the Western Division very much below. I have therefore reduced the former and increased the latter to what I consider a reasonable scale.

10. If my proposals are approved, and after the establishment is properly organised

and in working order, the desirability
of a very light draft steam launch
below the anicut might be considered.
At present it takes the best part of
a day to visit one Lanka, with the
aid of a launch 2 or 3 might easily
be inspected.

I have the honour to be,
Sir,
Your Most Obedt Servt.

2.

The above totals do not include Overseers' clerks since the Examiner of P.A. Accounts has excluded them from the Scale communicated by him with his letter No. 1101 $\frac{A}{E}$ of 19.9.98. Besides orders of Government on the question raised in this office No. 626 Lk of 3.10.98 whether Overseers' clerks should be considered Supernumerary or being to a fixed Scale are awaited.

3

No details for Temporary Establishment are now given as the Examiner, in his office Note embodied with the memo, under reply, says that the totals given against the present Scale under that Establishment is correct.

I have the honour to be,

P. W. DEPARTMENT.

READ the following:—

From the Suptg. Engineer I Circle No. 1533 S. O. of 15 October 1898.
From the Chief Engineer for Irrigation, No. 83 E.W. dated 27th October 1898.
From the Examiner, P. W. Accounts, No. 3937 B/E, dated 19th November 1898.
From the Suptg. Engineer, Ist Circle, No. C/290, dated 8th December 1898.
From the Examiner, P. W. Accounts, No. 162 B/E, dated 16th January 1899.

ORDER

With the first of his letters read above, the Suptg. Engineer I Circle submits two proposition statements, one for the Executive, and the other for the Subordinate Establishment, required for the proper working of the River conservancy Act in the three Delta Divisions of the Godavari Dt.

2. The entertainment of three temporary overseers, on Rs.60 each per mensem for executive work is sanctioned. The Chief Engineer P.W. Department will nominate the men and post them to the Circle as early as possible.

3. The subordinate establishment detailed in the statement submitted by the Suptg. Engineer with his No. 1533 G.D. d/15th October, 1898, is also sanctioned.

4. The question raised in para 10 of the Suptg. Engineers' ^{first} letter may be submitted for consideration after the expiry of a year.

5. With reference to the concluding

P. W. 4
20-14-11-98.

P. W. 2

portion of the Examiners Office Note No. 3937 B/E, d/19th November 1898, the Suptg. Engineer will submit a statement showing by Divisions the existing sanctioned establishment of the Godavari Delta under "Water Regulation", "Navigation" and "River Conservancy".

6. The attention of the Suptg. Engineer is drawn to the remarks made in the Examiners Office Note No. 162 B/E, d/16th January 1899.

7. The sanction accorded in paras 2 & 3 of these Proceedings has been registered as Provincial No. 13 W of 1899-1900, and classified as Establishment.

To, The S. E. I Circle.

,, Exar. P. W. Accounts.

,, C. E. for Irrigation.

Chief Engineer P. W. D.

Note. With reference to G.O. No. 590 I d/3rd August 1898, appointing the Executive Engineers of the three Delta Divisions of the Godavari Dt., as conservators of the rivers within their jurisdiction, the Suptg. Engineer, I Circle, submits for the sanction of Govt. two proposition statements, one for the Executive and the other for the subordinate establishment required for the proper working of the Act. The work to be done is as follows :-

(a) The training of the river.

(b) The regulation of all that goes on within the area defined.

(c) Keeping the surveys of the river bed up to date.

(d) Protection of the River banks.

(e) Prevention of the irregularities within the bed, such as unauthorised planting of crops and navel and of interference with navel replanted for training purposes.

2. The Suptg. Engineer states that the present staff of the Divisions is inadequate to carry out the new duties, and that an increase to the establishment is imperative. The length of the charges in the Godavari Western and Central Divisions being much in excess of that in the Godavari Eastern Dn, the Suptg. Engineer proposes that each of the former should be constituted a separate sub division in charge of a permanent supervisor with one temporary overseer under him, and that the smaller charge in the Godavari Eastern division should be placed under an overseer and form part of the Rajahmundry Sub Division. Three additional upper subordinates, one for each Division, are accordingly required, and it is proposed to sanction the entertainment of three temporary overseers on Rs. 60 each per mensem.

3. The river charts being old and in need of revision, an entirely new survey will have to be made in many cases and a complete and accurate register of holdings will also have to be prepared. For this purpose the Suptg.

Engineer

Engineer

Engineer suggests that two temporary surveyors on Rs.80 should be sanctioned for the Central and Western Divisions and one for the Eastern Division.

4. The Suptg. Engineer also states that two conservancy inspectors

are required for each of the Central and Western Divisions and one for the

Eastern Division, the duty of the inspectors being to continually travel

up and down the river banks, to report

all cases of unauthorised planting, cultivation, encroachment &c, and to

assist the surveyors from November to

May in revising the river charts and

preparing the registers.

5. In addition to the above, the Suptg. Engineer applies for the

following establishment.

Temporary.

(a) 1 draftsman on Rs.40 per mensem

(b) 2 peons on Rs.6 each under each conservancy Inspector

(c) 4 peons on Rs.6 each under each Surveyor

(d) 1 clerk on Rs.20 per mensem

(e) 2 peons on Rs.7 each per mensem

Permanent

(f) 1 clerk IV Class 3rd grade (Rs.20 - 2 - 30)

(g) 3 peons on Rs.7 each per mensem

Item (a) is apparently required

for the preparation of charts and maps, and the remaining items are within

the authorised scale of establishment

for subdivisions and surveyors.

6. The Suptg. Engineer adds that after the establishment is properly organised and in working order, the desirability of a very light draft steam launch below the anicut might be considered, as at present it takes the best part of a day to visit one Lanka and as two or three lankas can be easily in-

spected with the aid of a launch. This question may be considered after the expiry of a year.

7. The Chief Engineer for Irrigation ^{remarks} considers that the constitution of new subdivisions with the establishment proposed by the Suptg. Engineer appears necessary.

8. In para 3 of his office note No.3937 B/E d/19th November 1898, the Examiner points out that the existing "Water Regulation" "Navigation" and "River Conservancy" establishments in the Godavari Dt. have been sanctioned for the whole Delta, and that the present seems a very desirable opportunity for distributing the establishment by Divisions. It is therefore proposed to call on the Suptg. Engineer to submit the required statement.

9. In his Office Note No.162 B/E d/16th January 1899, the Examiner points out certain discrepancies in the proposition statement submitted by the Suptg. Engineer, and his attention will be drawn to them.
