NOTE BY TECHNICAL SECTION.

Name of work Cemetery at Viriamagrum

Amount of Estimate £ 1660.

The plan & estimate under review amounting to £ 1660, provide for extending the Cemetery at Viriamagrum.

The extension will be to the west of the cemetery, by dismantling the existing western wall and constructing a new wall 100 feet long, as shown on tracing plan.

The soil is stated to be red earth.

The wall will be built of rubble in mortar 1.9" thick and 6.9" high to top of coping and founded on a feet of concrete. The surface of the wall will be plastered with 2 coats of lime and whitewashed.

The rates are fair, they have been examined with the Divisional schedule.

The existing compound wall is of brickwork and it is not clear why the proposed extension should be built of rubble masonry, the former, it is thought will be cheaper.

Cheaper, as the Divisional rate for brickwork in mortar is Rs 12.8. a per unit, exclusive of carriage of materials, against Rs 15.10.00 for rubble masonry.

The plan & estimate have not been counter-signed by the Venerable the Archbishop of Madras but they have been approved in the Ecclesiastical Dept.

Rates in Div's schedule have already been shown to be much too low, & to need revision. Local officers had doubtless good reasons for proposing rubble in place of brick.
