SIR,

I have the honor to bring to your notice that the weir in the Simmarazu tank of Lingamparti in the Godavari Eastern Division has been provided with falling shutters and a watcher has been employed to look after them. His pay from the time of his employment during the current year is being charged to the repair estimate sanctioned by me for the purpose.

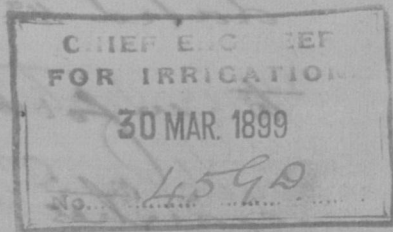

2. As the continuance of the watcher for the next year is also necessary, I have the honor to submit herewith an estimate

estimate amounting to Rs 72 for the same
for sanction of Government under G.O.
No. 331 W of 2-2-99.

I have the honor to be,
Sir,

Your most obedient servant

Camp.

SIR,

With reference to your No. 7/279,
dated 11th April 1899, I have the honor
to inform you that the usual keer-
gauties are employed by the Revenue
Department on the Nimmuraga Sand
of Singampatty; but the Executive
Engineer reports that they cannot
be trusted to look after the Shutter
as they allow the villagers to
tamper with them.

2. The lascar is not merely re-
quired to raise the Shutter after
the sand has subsided, but to
attend to them at other times.

3. This

3. This tank No 40 on the Imperial
List, is about the most important
in the Circle. It has a catchment
area of 42 square miles, and irri-
-gates 3300 acres.

I have the honor to be,
Sir,
Your most obedt Servant.

No 684. G. E. dated 27th March 1899 and
No. 964. G. E. dated 3 May 1899

Eves 4

Forwarded to the Chief Engineer
P. W. D. The man referred to should
be employed as a bank laborer
and required to work as one. The
Village Establishment being what
they are, it is extremely likely that
the weir shutters will be tampered
with unless some one responsible
to the P. W. D. is in charge.
