

Public Works (1899) Department.

G.O., No. 1869 W

DATED 20th July 1899.

[Despatch Abstract.]

Establishment:

The establishment, for a period of 12 months, of a Surveyor on Rs 70 and 6 Lascars on Rs 6 each per mensem for the further investigation of the Annamalakka Project, in the Godavari Western Division, sanctioned.

May
Note in G.O. No. 1486 W, of 14 June 1898
sanction was accorded to the establishment
of the Anumulaika Project in the God.
Woolen Division.

The S. E. L. ride
a Examiner, P. W. Account
a Chief Engineer for Inquisition

Surveyor and Rs. 70 permanent
Lascars and Rs 6 each
Draftsman and Rs. 60
Clerk and Rs. 25.

At the Chief Engineer, P.W.D., was
asked to post for the work an
upper subordinate, having good experience
in irrigation works. In accordance
with the above order, the Supy. Engineer,
Circle, was told that an upper subordinate
could be posted early in September
1899. Mr. Larmine, while officiating
as Chief Engineer for Irrigation,
expressed his opinion that the in-
vestigation did not then require an
upper subordinate and that the only
establishment required was only a
gaoing gunasta to record the river
discharge and rainfalls, which to be of
any value, should extend over a period
of 5 years. The Chief Engineer, P.W.D.,
in concurring with Larmine's view,
invited Mr. Hughes' opinion on the
matter. Mr. Hughes, however, said
that as the S.E. wanted an upper
subordinate, one had better be given,
if available, and the S.E. I Circle
was informed that as no upper subordinate
was available, the requirements
would

would be kept in view.

It was only in February 1899,
that an upper subordinate was
posted for the work.

2 Flag F

The Ex. Engineer now submit
a proposition statement for the
establishment for a surveyor and 6
lascars for taking the survey of the
existing system of irrigation and
the Jerracaloo and states that
the establishment now applied for
will suffice, as he proposes to
select a draftsman with a good
knowledge of surveying. The line
on which he proposes to prosecute
the re-investigation is described
in his letter No. 914 & W., of 26th
April 1899. The Chief Engineer
for Irrigation considers the
establishment asked for to be
necessary and it is, therefore,
proposed to sanction the application.

L. Hughes
P.W.D.
H.S.H.

With reference to your addition to the draft order below, it is respectfully submitted that sanction to the entertainment of temporary establishment lapses with the fiscal year for which the establishment is sanctioned and that there is no need for cancelling the sanction accorded in G.O. No. 1488W of 14-6-98. In view as Mr. Dady was posted in February last for the investigation of this project, the establishment may probably have been entertained during that month and the sanction will then have been partly availed of. Para 2 of the draft order may therefore, it is submitted, be scored out.

27. 4. 99.
 Assistant Engineer
 for Superintending Engineer
 I Circle

Letter No. 3438 dated 24-2-1899 from
D. Marshall Esquire, Executive Engineer,
Godavari Western Division to the Superintending
Engineer I Circle.

With reference to your no. 347 G.W.
dated 13.2.99, I have the honor to report that
one of the most important points in the investiga-
-tion of the project is to determine how the
existing irrigated area under the Yerracaloo
is to be supplied with water from the proposed
Reservoir.

2. There are at present about 10,000 acres
under the Yerracaloo supplied directly by
channels or by storing the water in tanks. As
a large portion of this area is Lamindari
land, Government would be involved in
endless litigation, unless an adequate supply
of Compensation water is provided.

3. In order to ascertain the most economical
method of distributing this Compensation water
it is essential to make a complete and accurate

accurate survey of the existing system of irrigation. I therefore propose to employ Mr. Dady on this work as soon as he arrives.

4. Even if the project is not carried out, this survey will be most useful as a basis on which to work out improvements to the Yerracaloe irrigation. Moreover I am of opinion that the General principle on which the project must be ~~worked~~ put, is to extend and improve the present system.

5. As regards the proposal of the Chief Engineer to move the site of the bund higher up the stream, I do not think this is possible, as the valley widens out so much that several miles of bund would be necessary and the tank thus formed would only be a shallow one. Mr. Larminie was, I think, also of this opinion vide office note of 6.8.98, Chief Engineer's memo No. 5009C bearing your No. 1759 Q.D. 14-11-98 20-11-98

6. I am inclined to think that the idea of constructing a tank in the form of

of a flood moderator must be set aside and that possibility of constructing one of smaller dimensions at the original site may now be investigated.

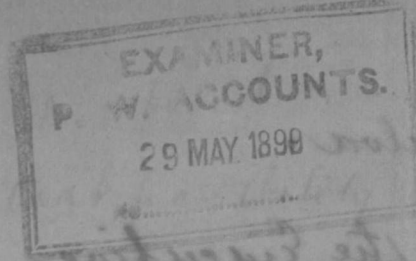

7. The establishment proposed ~~with~~ ^{will}, I consider, be sufficient for the present, as I propose to select, if possible, a draftsman with a knowledge of surveying.

SIR,

Referring to notification at page 208
part II of the Fort St. George Gazette of 7-2-99
posting Mr. E. Dady Sub Engineer for the
further investigation of the Annumallanka project
I have the honor to submit herewith a proposition

Statement for the marginally noted temporary

1 Surveyor for 12 months	Establishment proposed to be
on Rs 70.	employed at present against
6 Survey lascars do	the sanction accorded in G.O.
on Rs 6 each.	No. 1486 W d/14-6-98

+ May B.

2. The establishment now proposed is considered
sufficient for the present, the work in hand
being the survey of the Existing System of

of irrigation from ^{under} Yernacalva.

3. A copy of letter from the Executive Engineer, Godavari Western Division briefly indicating the lines on which he proposes to prosecute the re-investigation, is enclosed.

I have the honor to be
