In connection with this matter you inquired, on another paper, why we did not indent for more Remington machines. It is submitted that we got two new machines only the other day. I believe these two are the only machines now fit for work - but have written to Madras for a full report on the condition of the other machines which are out of work. Should these prove to be beyond repair, I would recommend that sanction be obtained for a third Remington. At present one of these machines is at Asten - Madras and the other is at Madras - a second machine is very necessary for the latter place.
