To,

The Secretary to Government,
P. W. Department.

Dated the 2nd August 1899.

Sir,

I have the honour to inform you
that whilst serving in the Madras P. W. D.
and before my services were lent to H. H. the
Nizam's Government, I was in charge for some
considerable time of the Famine operations
in the Vijay District of the Madras Presidency
in 1897. At the end of these operations, my
name was sent up together with other-
officers and subordinates as having
qualified for the extra privilege leave,

leave granted to all officers who were engaged on these Famine operations.

I am anxious to avail myself of this leave before it lapses, and I request you will kindly address the Madras Government through the Residency Hyderabad with a view to ascertaining how much such leave is due to me and on what date such leave lapses.

I may here state that I applied for one month's Famine leave in December last, but I was not fortunate enough to obtain it and so I now request you will take early steps in this matter or the leave will have lapsed.

I have &c.

It is evident that Mr. Allen has not seen Gov. No. 319 W of 2-2-99.

This order was communicated to all Administrative Officers of the P.W.D. for communication to Officers & subordinates concerned. It is submitted that the S.C.

I think should have communicated copy to Mr. Allen.

As personally shown by you, I have marked out the foundation for North End Cokingulak in Thoraipadi small tank, and the foundation trench has also been dug.

It is required to dig 140 feet of foundation for body wall and concrete laid 3 feet high and 1 foot wide. In this length of Cokingulak in three places the ground is low and as it required only to have 3 feet depth of foundation in these three places, the concrete will have to be put above ground level and therefore it will not be strong, so I think it would be better to put in 1 foot depth of concrete in the three places mentioned as low i.e. one foot underground and 3 feet above ground to make the work strong. I request favour of orders. The following is the measurement of the additional height of concrete required in the 3 low places mentioned for the Cokingulak.

$$2 \times 30' \times 4' \times 1 = 240.$$

$$1 \times 27 \times 4 \times 1 = 108$$

$$\text{Total } 348.$$

As I have to put in consent
after the receipt of your orders
on the above proposal, I
request you will send me
orders soon.
