Reference—No. 36, dated 31st May 1899.

At the instance of the Collector of Salem the court requests the sanction of Government for the loan of the services of the local officers of the Public Works Department for the purpose of inspecting the Berikai and Ettipalli tanks in the Berikai estate and preparing estimates for their thorough repair. In regard to the Berikai tank the work recommended by the Collector is the complete repair of the sluices and surplus weir. This involves the taking of levels and the provision of masonry work and a lock and key for each sluice. As to the Ettipalli tank a skilled opinion is required with reference to three large breaches in the supply channel and also with regard to a proposal to divert the water of the Tirtham river into the tank. The court's third member being on tour in the locality has taken the opportunity to inspect the two tanks and concurs with the Collector.

2. The Collector will, in the meantime, be requested to ascertain and report whether the proposed diversion to the Ettipalli tank of a portion of the supply received in the Tirtham river is calculated prejudicially to affect any person owning land lower down the river.
