G.O., No.

2706 W

DATED

12 Oct 1899.

[Despatch Abstract.]

Establishment, the entertainment,  
during the remaining portion of the  
current official year, of a certain  
~~temporary~~ — in the Cuddapah D., sanction

[illegible][illegible]

P. W. 4.  
1,000-18-7-99.

79.

Note. It is reported that the services of a clerk are required to put the famine records into order and that the need of an additional draftsman has arisen from the fact that the work of the Drawing Branch has, owing to frequent changes by transfers and sickness among the drawing staff of the Cuddapah Division, fallen much in arrears. Over 60 estimates for repairs to Railway affecting tanks <sup>have if it is at all</sup> ~~having~~ been received and many more are expected during the next 18 months or so, as the number of such tanks are nearly 600. The Suptg. Engineer strongly recommends the proposal as he states, "effort is being made to extend irrigation and thereby render the District less liable to famine and even now scarcity is threatening in parts of Cuddapah and Bellary and

and there is urgent need for estimates for works that would be suitable for relief". The Chief Engineer for Irrigation endorses the Suptg. Engineer's recommendation. In these circumstances, it is proposed to sanction the establishment applied for till the end of the current year and to ask the Suptg. Engineer to report at the end of the year on the necessity for the further retention of the Draftsman's services.

Letter No. 107 dated 26<sup>th</sup> Aug 1899. from  
A. A. Morin <sup>SE</sup> Esq. Executive Engineer, Maddurak  
Division, to the Superintending Engineer,  
III Circle, Bellary.

With reference to your letter No. 2425 dated 28<sup>th</sup> June 1899 and 3008 dated 14<sup>th</sup> August 1899, I have the honor to submit herewith a proposition submitted with the request that you will obtain the sanction of Government to the proposal as early as possible.

The necessity for the Clerk proposed has already been explained in my letter N<sup>o</sup>. 1173 dated 21<sup>st</sup> June 1899 and since that date the Deputy Examiner has inspected my Office and urged early steps in the matter of putting the Examinee Records into order.

With reference to the application for a temporary Draftsman the necessity arises from the state of arrears into which the work of the Drawing branch has fallen owing to frequent changes & interruption. Head Draftsman J. M. Swarnam Pillai was transferred in May 1898 when the revised Estimate for Chapad Project was under preparation and the designs for masonry works were in progress. No one was appointed in his place for a month and at the same time Mammaz Razvi was appointed Head Draftsman of the Railway affecting Tank Party.

The latter was an Experienced man and has since been replaced by two men in succession with delays on each occasion and the present man is quite inexperienced, only a tracer in fact. The Tank Restoration Scheme Head Draftsman acted as Head Draftsman for 10 days in May and then went away on Sick leave.

A new Head Draftsman the present incumbent joined in June.

He worked hard during the preparation of designs for Chapad Project but his heart

gradually gave way too and he went on a month's sick leave in March 1899.

Since his return from leave he has never been in good health suffering continually from fever, and latterly having got much worse was obliged to apply for 2 months more sick leave. My Drawing Establishment therefore now consists of a tracer, and Manna Raspu the Railway affecting Tanks Head Draftsman cannot well be spared as he is busily engaged in the preparation of Railway affecting Tanks group maps.

A list of the more important work pending is appended.

In addition to these, over 60 Estimates for repairs to Railway affecting Tanks have just been received and more will be coming in during the next 18 months at so the total number of such Tanks being nearly 600. I doubt if the 2 months leave now given to the Head Draftsman will render him thoroughly fit for work again, and if the temporary Draftsman applied for is granted, I shall not be solely dependent on the permanent man.

Estimates actually in progress.

P. 3185 W Dated 31<sup>st</sup> August 1899

Copy forwarded to the Chief Engineer  
P.W. Department, through the Chief Engineer  
for Irrigation with a very strong recommenda-  
- tion that the assistance asked for be sanctioned.  
It is quite impossible to deal with the mass  
of work in this circle without employing  
temporary men, <sup>over & above</sup> ~~and also~~ the ordinary Establish-  
- ment. The reason for this is the effort that is being  
made to extend irrigation and thereby render  
the District less liable to famine, and when  
scarcity is threatening in parts of Maddur and  
Bellary and there is urgent need for Estimates  
for works that would be suitable for relief.  
The popular idea that the III Circle is a light

light me, is altogether erroneous so far  
as the Executive Engineers and their establish-  
ments are concerned. There are in the  
opinion of the undersigned few divisions  
in which there is so much to be done.

W. S. Adair  
Lt. Col. R.E.  
Superintending Engineer  
in Charge. Bellary

13 SEP 1899 Reference to P. W. D. Code.

Part II.

Chapter I, Para. 30.

Tabular Statement to accompany pro-  
posals for changes in establishments.

1. All proposals for changes in the scales of permanent establishments must be accompanied by a statement in Part I of this form when the changes relate to the engineer or upper subordinate establishments and in other cases by a statement in Part II of this form.
2. The column headed "present scale" should invariably show the existing sanctioned scale (not the strength of the establishment as it actually stands at the time), and should be verified by the Examiner before the statements are forwarded to the sanctioning authority.
