Establishment

Sanctioning the temporary entertainment of draftsmen in the Ganjám, Vizagapatam and Gódávari Eastern divisions.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Establishment.

Read—the following papers :—

Circular No. 3 G., dated 8th March 1897.

From W. C. DeMORGAN, Esq., M.I.C.E., Superintending Engineer, I Circle, to the Chief Engineer for Irrigation, dated Camp Bank Canal Gódávari Western Delta, 25th September 1899, No. 993-G.L.

With reference to Memorandum No. 3 G. of 8th March 1897, I have the honour to inform you that I fear it is impossible to complete the records of plans in the Ganjám, Vizagapatam and Gódávari Eastern division offices without the assistance of an additional draftsman. With the sanctioned establishment of two draftsmen, the above divisions are unable to keep abreast of current work, although I know that all concerned are doing their best. In the Gódávari Western and Gódávari Central, the case is different. In the former the plans have long been in order and systematically registered, and in the latter the number is comparatively few, and there are hardly any but those belonging to the delta. These two divisions consequently require no assistance.

To complete the register in the other three divisions is no light task. The Executive Engineers concerned had already expressed their inability to pay more than occasional attention to the matter, and requested me to apply for an extra draftsman. This I was unwilling to do, as I am aware how difficult it is to confine a special subordinate in an office to the special task for which he is appointed, and I hoped that it might be possible to get something done by the regular staff. I am now, however, convinced that this is impracticable, and that three extra draftsmen will be required. If you agree with me, I will submit a proposition statement for three draftsmen holding second-class certificates on Rs. 50 each per mensem. For less than Rs. 50 I could hardly procure suitable candidates.

To the Superintending Engineer, I Circle, dated 7th October 1899, No. 14 I.

From W. C. DeMORGAN, Esq., M.I.C.E. Superintending Engineer, I Circle, to the Chief Engineer for Irrigation, dated Cocanada, 21st October 1899, No. 1088-G.L.

With reference to your No. 14 I. of 7th October 1899, I have the honour to submit a proposition statement for three draftsmen for the Gódávari Eastern, Vizagapatam and Ganjám divisions to be employed in completing the register of plans of current works as directed in Circular No. 3 G., dated 8th March 1897.

2. The circular has received attention, but as already reported by me, only intermittent attention could be bestowed on it.

Circle, in his letter No.993 G.L., dated 25th September 1899 states that it has been found impossible to complete the records of plans in the Ganjam, Vizagpatam and Godavari Eastern Divisions without the assistance of an additional draftsman and that the existing staff of the drawing establishment is unable to keep abreast of current work. He also states that he is convinced of the necessity for an extra draftsman in each of the above divisions. The Chief Engineer for Irrigation recommends the application and it is proposed to sanction it.

No. 3 G, dated 8th March 1897.

Circular Memo:

In para 2 of G.O.No.741 I, dated 12th September 1895 copies of plans of masonry works were ordered to be recorded in the division offices and registers --- opened in which as works are repaired the standard of efficiency and other information can be entered.

2. For minor work for which Capital and Revenue accounts are not kept the T.R.S. Memoirs and the --- revised lists now under preparation will be sufficient for registry purposes.

3. For works for which Capital and Revenue accounts are kept and agricultural works the accompanying form which has been filled in by the Superintending Engineer, V Circle should be adopted.

4. Superintending Engineers are requested to make their own arrangements to have the forms printed. In printing them spaces should be left at suitable -- intervals and the lines far apart to admit of alterations and additions.

5. A still more important part of the order above quoted is that relating to the recording of the plans themselves.

6. Cases are frequently brought to notice in which the plans of works of comparatively recent date are missing or not readily found and as no work is ever built without a plan this must be due to a want of systematic record in the drawing branch of Division offices.

7. Whenever a work is finished, a plan of the work,

which may be either the original sanctioned plan or a certified copy of it, should be sent with the completion report for record in the division office. Any alterations made during execution and actual nature of foundations should be entered on the plan with a certificate of the Executive officer or subordinate to the effect that work has been carried out as shown.

8. To enable plans to be readily referred to and properly taken care of they should be kept in specially constructed cupboards with drawers or pigeon holes.

9. With regard to works already completed and for which plans are not already recorded, Superintending Engineers are requested to submit proposals for completing the record so far as is practicable or advisable.
