Quarters

Ordered that the sanction of the Government of India be applied for to the estimate of Rs. 3,230 for additions and improvements to the — of two Assistant Jailors in the Central Jail at Rajahmundry.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

READ—the following papers :—

From Lieutenant-Colonel W. O'HARA, I.M.S., Acting Inspector-General of Prisons, to the Chief Secretary to Government, dated Ootacamund, 1st July 1899, No. 3998.

I have the honour to submit, for the approval and sanction of Government, plan and estimates, amounting to Rs. 3,600, for improvements to the Assistant Jailors' quarters in the Rajahmundry Central Jail.

2. At his inspection of the jail in October 1897, Mr. Cardew observed that all the quarters provided for the permanent staff were not occupied, and drew the attention of the Superintendent to the desirability of insisting on the Warders and Assistant Jailors living in the premises provided for them and directed him to take steps to enforce the order. It transpired, however, that the warders' lines needed considerable repairs and that the quarters allotted to the Assistant Jailors were not fit for habitation. The repairs to the warders' lines were undertaken by the Public Works Department, but the question of providing suitable accommodation for the Assistant Jailors remains, and the plan and estimates now submitted are designed to meet this want.

3. The circumstances which led to the unusual delay in the submission of this application will be seen from the following: In a letter, No. 772, dated 11th June 1898, the Superintendent reported that the unoccupied set of quarters east of the lines (which was ordered to be fitted up for an Assistant Jailor) was too small to meet the requirements of an Assistant Jailor and accordingly recommended the addition of an enclosed tiled verandah and the erection of a compound wall of brick in mud with chunam plastering. In this office letter, No. 3131, dated 18th June 1898, the Superintending Engineer, I Circle, was requested to have estimates for the necessary repairs and additions prepared and forwarded. On the 26th July 1898, the Superintendent reported that the Public Works Department Overseer inspected the warders' lines for repairs thereto, but that he refused to inspect the subordinates' quarters (enclosed is a copy of the Executive Engineer's letter in which that officer explains that according to Public Works Code rules he could take no steps to prepare the estimates required, without sanction, as the estimates would amount to over Rs. 500). After some further correspondence, the Superintendent was informed in this office No. 4861, dated 23rd August 1898, that since the Executive Engineer's letter (which was dated 22nd July 1898) was written, the 500 rupees limit for estimates had been abolished by Government, and that there was, therefore, no longer any necessity for Government sanction.

4. At this juncture another important work demanded urgent attention, namely, the repairs to the roofs of the sleeping barracks. The Superintendent called for estimates for this work also, but up to the 12th November 1898 nothing had been received, though he reported that several reminders had been sent to the Executive Engineer. It then transpired that the work of re-tiling the barracks could not be carried out during 1898–99 as funds were not available, and the Executive Engineer in his No. 1293 L., dated 5th January 1899, to the Superintendent, stated that unless the work was considered emergent no special application could be made for funds. On this a letter No. 341, dated 16th January 1899, was addressed from this office to the Superintending Engineer requesting that the Executive Engineer might be instructed to regard the work of repairs to the roofs of the sleeping barracks as urgent.

Estimates for this work were received in this office on 8th February 1899, but, on the proposal of the Superintendent, which was approved by the Superintending Engineer and accepted by Government, the execution of the work was handed over to the Jail department, the Superintendent being made an imprest-holder, in the matter of funds, under the Executive Engineer (*vide* G.O., No. 1101 W., dated 24th April 1899).

5. As a necessary consequence, the estimates for improvements to the Assistant Jailors' quarters were delayed. Further, it was subsequently discovered that the original proposals could not be carried out and modifications had to be adopted. The estimates provide for two sets of quarters each costing Rs. 1,800.

No. 1787, Judicial.

Approved and transferred to the Public Works Department.

8th July 1899. (Signed) A. R. KNAPP,
Under Secretary.

From W. C. DEMORGAN, Esq., M.I.C.E., Superintending Engineer, I Circle, to the Chief Engineer, Public Works Department, dated camp Chettipett, 26th September 1899, No. 2027 G.E.

Referring to your memo. No. 3351 C., dated 4th August 1899, I have the honour to inform you that the buildings for the improvement of which estimates have now been submitted are portions of "constables' huts" (*vide* item 7 of the register of public buildings in the Rajahmundry taluk, Gódávari Eastern division). The capital cost of each of these portions amounts to Rs. 609, the area being 29′ × 28′, or 812 square feet, at As. 12 a square foot. The salary of one of the Assistant Jailors' quarters is Rs. 40 to 50, and of the other Rs. 35 to 40.

2. I enclose a copy of letter, No. 730 of 22nd August 1899, from the Superintendent, Central Jail, Rajahmundry, from which you will observe that the heavy cost is chiefly due to the building having to be enclosed all round by a compound wall which itself amounts to as much as Rs. 1,800. The necessity for this wall is explained by the Jail Superintendent and I agree with him.

ENCLOSURE.

From the Superintendent, Central Jail, Rajahmundry, to the Superintending Engineer, I Circle, dated 22nd August 1899, No. 730.

With reference to your letter, No. 1697 G.E., dated 9th August 1899, I have the honour to inform you that the appointment of one of the Assistant Jailors carries a salary of Rs. 40 to 50, and the other Rs. 35 to 40.

2. The quarters have at present only two rooms and the space is quite insufficient. To suit an officer of this rank, the quarters must be similar to the quarters of the Hospital Assistants at least.

3. As it was feared that the cost of converting the present building similar to the Hospital Assistant's quarters might be very high, it was suggested in paragraph 2 of this office No. 722 D. of 11th June 1898 (copy attached) to the Inspector-General of Prisons that an enclosed tiled verandah be added to the existing building and a wall of brick in mud be erected round the house. The Inspector-General of Prisons approved of this suggestion and requested the Executive Engineer, Gódávari Eastern division, to prepare the estimate. But when your departmental officers inspected the building it was too late to admit of verandahs being built all round. It was then suggested to erect a separate building as in the plan behind the present quarters, and the estimate was accordingly framed and submitted.

4. With reference to your note that the cost of the proposed alterations alone exceeds the permissible limit as regards rent, I have to state that none will be charged from the officers occupying the buildings, and the cost of the additions cannot be limited to any such permissible amount as the extra cost is an absolute necessity.

5. The chief item which appears to have swelled the amount of the estimate to Rs. 1,800 is the cost of erecting a wall round the house. The present building is situated far away from the town close to a jungle and a compound to all is therefore necessary.

Note by the Chief Engineer, Public Works Department.

The estimate, amounting to Rs. 3,230 (as altered in this office), for improvements and additions to the Assistant Jailors' quarters (two blocks) in the Central Jail at Rajahmundry, is recommended for sanction with the following remarks :—

(1) If the presence of white ants is suspected, the site of the building should be laid bare by excavating 6 inches deep before construction is commenced, and if evidence of white ants' nest is found, the nest should be entirely removed.

(2) The compound wall should be reduced in section as altered in plan. The wall will be quite strong enough if made with pillars 1′ 3″ square, spaced about 8 to 10 feet apart, and the intermediate wall made 9 inches thick. The estimate has been altered accordingly in the office, and the cost reduced by Rs. 370 for both blocks.

(3) The Superintending Engineer will obtain the countersignature of the Inspector-General of Prisons to the plan and estimate before commencing the work.

(Signed) W. B. DEWINTON,
Chief Engineer.

4th November 1899.

ORDER—No. 3109 W., dated 30th November 1899.

The estimate of Rs. 3,600 submitted by the Superintending Engineer, I Circle, for additions and improvements to the quarters of two Assistant Jailors in the Central Jail at Rajahmundry has been reduced to Rs. 3,230 by certain alterations made by the Chief Engineer in the constructive details of the compound wall. One of the Assistant Jailors draws a salary of Rs. 40 to 50, and the other Rs. 35 to 40, and the expenditure proposed is considerably in excess of the permissible limit. The sanction of the Government of India will, therefore, be applied for, under paragraph 17 (3), Chapter X, Volume I of the Public Works Code.

2. Attention is drawn to the Chief Engineer's note read above.

Quarters

Requesting sanction to the estimate of Rs. 3,230 for additions and improvements to the — of two Assistant Jailors in the Central Jail at Rajahmundry.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

LETTER—from

W. B. DEWINTON, ESQ.,
Secretary to the Government of Madras,
Public Works Department,

To

THE JOINT SECRETARY TO THE GOVERNMENT OF INDIA,
PUBLIC WORKS DEPARTMENT.

SIR,

I am directed to state that two Assistant Jailors attached to the Central Jail at Rajahmundry are at present housed in portions of a building known as "Constables' huts" at that station, the accommodation provided for each being only two rooms covering an area of 29 × 28, or 812 square feet. It is urged that these quarters are quite inadequate and that the men should be provided with accommodation at least similar to that allowed for Hospital Assistants. It is therefore proposed to add at a cost of Rs. 3,230 two detached buildings, each containing two rooms and a verandah, in the rear of the existing quarters with a compound wall around each block. The pay of one of the Assistant Jailors is Rs. 40 to 50, and that of the other Rs. 35 to 40 per mensem, and both the men are entitled to free quarters. The cost of the proposed additions is considerably in excess of the permissible limit, as the rent on each block after completion of the improvements will amount to Rs. 14·51 per mensem, while 8 per cent. of the salary of the occupants is only Rs. 3·8 and Rs. 3·1. It will be observed from the accompanying plan that the additions proposed are only moderate, but the item "compound wall," the cost of which alone amounts to Rs. 410, has very much increased the amount of the estimate. The latter is considered absolutely necessary, as the quarters are reported to be situated far away from the town and close to a jungle. I am, therefore, to request the sanction of the Government of India to the proposed expenditure under paragraph 17 (3), Chapter X, Volume I of the Public Works Code.

I have the honour to be,
Sir,
Your most obedient servant,

(Signed) W. B. DEWINTON,
Secretary to Government.

OFFICE OF THE INSPECTOR-GENERAL OF PRISONS,

No. 3998 *Dated* Potacamund *the* 1st July 1899.

From Lieut:Col.W.O'Hara,I.M.S.,
~~A. G. CARDEW, Esq., M.A.,~~
Ag:INSPECTOR-GENERAL OF PRISONS,

To

THE CHIEF SECRETARY TO GOVERNMENT.

10

SIR,

Enclosures.

I have the honour to submit,for the approval and sanction of Government,plan & estimates amounting to Rs 5,600 for improvements to the Assistant Jailors' quarters in the Rajahmundry Central Jail.

2. At his inspection of the Jail in October last Mr.Cardew observed that all the quarters provided for the permanent staff were not occupied,and drew the attention of the Superintendent to the desirability of insisting on the Warders & Assistant Jailors living in the premises provided for them and directed him to take steps to enforce the order.It transpired,however,that the Warders' lines needed considerable repairs and that the quarters allotted to the Assistant Jailors were not fit for habitation.The repairs to the Warders' lines were undertaken by the Public Works Department but the question of providing suitable accommodation for the Assistant Jailors remains,and the plan & estimates now submitted are designed to meet this want.

5. The circumstances which led to the unusual delay in the submission of this application will be seen from the following.In a letter No.772 dated 11th June 1898,the Superintendent reported that the unoccupied set of quarters east of the lines (which was ordered to be fitted up

for

for an Assistant Jailor) was too small to meet the requirements of an Assistant Jailor and accordingly recommended the addition of an enclosed tiled verandah and the erection of a compound wall of brick in mud with chunam plastering.In this office letter No.5151 dated 18th June 1898 the Superintending Engineer I Circle was requested to have estimates for the necessary repairs and additions prepared and forwarded.On the 26th July 1898,the Superintendent reported that the Public Works Department Overseer inspected the Warders' lines for repairs thereto,but that he refused to inspect the Subordinates' quarters,(Enclosed is a copy of the Executive Engineer's letter in which that officer explains that according to Public Works Code Rules he could take no steps to prepare the estimates required,without sanction,as the estimates would amount to over Rs 500/-).After some further correspondence,the Superintendent was informed in this office No.4861 dated 25 rd August 1898,that since the Executive Engineer's letter (which was dated 22nd July 1898) was written,the 500 Rupees limit for estimates had been abolished by Government,and that there was,therefore,no longer any necessity for Government sanction.

4. At this juncture another important work demanded urgent attention-namely,the repairs to the roofs of the sleeping barracks. The Superintendent called for estimates for this work also,but upto the 12th November 1898 nothing had been received though he reported that several reminders had been sent to the Executive Engineer.It then transpired that the work of re-tiling the Barracks could not be carried out during 1898-99 as funds were not available,and the Executive Engineer in his No.1295 L,dated 5th January 1899 to the Superintendent,stated that unless the work was considered emergent no special application could be made for funds.On this,a letter No. 541 dated 16th January 1899 was addressed from this office to the Superintending Engineer requesting that the Executive Engineer might be instructed to regard the work of repairs to the roofs of the Sleeping Barracks as urgent.Estimates for this work were received in this office on 8th February 1899,but,on the proposal of the Superintendent,which was approved by the Superintending Engineer and accepted by Government,the execution of the work was handed over to the Jail Department,the Superintendent being made an imprest-holder, in the matter of funds,under the Executive Engineer-Vide G.O.No.1101 W,dated 24th April 1899.

134 / 9-5-99 VIII

5. As a necessary consequence,the estimates for improvements to the Assistant Jailors' quarters were delayed. Further it was subsequently discovered that the original proposals could not be carried out and modifications had to be adopted.The estimates provide for two sets of quarters each costing Rs 1,800.

Enclosures. One

SIR,

Referring to your memo No. 3351 C, dated 4-8-99, I have the honor to inform you that the buildings for the improvement of which estimates have now been submitted are portions of "Constable's hut" vide item 7 of the Register of Public buildings in the Rajamundry Taluq, Godavary Eastern Division. The capital cost of each of these portions amounts to Rs 609, the area being 29'x28' or 812 Sq. ft. at say, a Sq ft. The salary of one of the Jailors quarters is Rs 40 to 50 and of the other

2. I enclose a copy of letter No. 730 of 22-9-99 from the Superintendent Central Jail Rajamundry, from which you will observe that the heavy cost is chiefly due to the building having to be enclosed all

all round by a compound wall which they amount to as much as Rs 1800. The necessity for this wall is explained by the Jail Superintendent and I agree with him.

I have the honor to be
Sir.

Endo: No 2027 GE. dt 26/30.9.99

Letter from the Superintendent Central jail, Rajamundry to the Supt. Engineer, 1st Circle No 730 dated 22.9.99

With reference to your letter No 1697 C.E., dated 9-8-99, I have the honor to inform you that the appointment of one of the Assistant Jailors carries a salary of Rs 40 to 50, and the other Rs 35 to 40.

2. The quarters have at present only two rooms and the space is quite insufficient to suit an officer of this rank, the quarters must be similar to the quarters of the Hospital Assistants at least.

3. As it was feared that the cost of converting the present building similar to the Hospital assistants quarters might be very high, it was suggested in para 2 of this office No 722 D. of 11.6.98 (copy attached) to the Inspector-General of Prisons that an Enclosed tiled verandah be added to the existing building and a wall of brick in mud and be erected round the house. The Inspector-General of

Prisons approved of this Suggestion and requested the Executive Engineer Godavari Eastern Division to prepare the Estimate. But when your Departmental officers inspected the building it was too late to admit of verandahs being built all round. It was then suggested to erect a Separate building as in the plan behind the present quarters and the Estimate was accordingly framed and Submitted.

4. With reference to your note that the cost of the proposed alterations alone exceeds the permissible limit as regards rent, I have to state that none will be charged from the officers occupying the buildings and the cost of the additions cannot be limited to any such permissible amount as the extra cost is an absolute necessity.

5. The chief item which appears to have swelled the amount of the estimate to Rs 800 is the cost of enclosing a wall round the house. The present building is situated far away from the town close to a Jungle and a

a compound to all is therefore necessary.
