In forwarding the plans & estimates for improvements to the kitchen attached to the sub-jail at Gooty I have the honoer to report as follows:-

The reference called for the provision of a chimney to the kitchen. But in order to provide a chimney it would be necessary to provide some thing in which the chimney must stand, i.e., a raised platform about 3 high and about $4\frac{1}{2}$ wide would have to be first constructed on which at least two semicircular arches would have to be constructed along side of one another, and in doing this a portion of the roof would have to be removed and reconstructed on a suitable design which would of course mean a large expenditure; and after all this expense had been incurred, it is very doubtful whether the prisoners would ever use it, for they would naturally prefer sitting down and cooking their food to having to stand up and cooking it at the fire-places which would be provided on the platform.

To obviate all this, the plans and estimates referred to are herewith submitted for your opinion and orders.

The first provides simply for removing the existing flab and pan tiles and re-roofing with pan tiles only. By this means the smoke would easily escape through the roof as is invariably the case with all other kitchens. This arrangement would only cost Rs 50.

The second estimate and plan provide for a ridge ventilator along the whole length of roof covered in with flab and pan tiles the same as existing roof, and would cost only Rs 100.

Either of these arrangements, I believe, you will agree with me, will prove far more effectual and useful and by far cheaper than providing a chimney which to say the least, natives of the class who will use the kitchen are utterly unaccustomed to.

19.10.99.

Letter No 6903 dated 13th October 1899 from G. F. Hancock Esq., Executive Engineer Bellary Division to Superintending Engineer, III Circle, Bellary.

With reference to your reminder No 2178 dated 9th Instant, I have the honour to inform you that an estimate for Rs 100 for the work in question has been forwarded to the collector for countersignature and the same will be sanctioned by me for execution when received back.

I enclose a copy of Sub Div^l Officer's letter No 1607 dated 4th August 1899, and under the circumstances mentioned therein, I have accepted the latter suggestion viz to provide ridge ventilators along the whole length of roof and have estimated accordingly.

Lieut. Col. W. L. C. Baddley R.E.

SUPERINTENDING ENGINEER,

3RD CIRCLE,

BELLARY.

To

THE

Chief Engineer,
P.W. Department,
Madras.

Sir,

2 Enclosures.

In reference to your reminder of the 5th Instant and G. O. N^o 1456 W of 6th June 1899, I have the honour to forward a copy of letter N^o 6903 of 13th Instant from the Executive Engineer Bellary with one enclosure.

2. It is not usual to build chimneys for sub jail cook rooms, in fact the type design of outbuildings for taluk offices vide G. O. N^o 1409 W of 28th May 1899 would not permit of a chimney being built for the cook room.

3. I have never before heard of any complaint about the type design of sub jail cook room, in which the smoke escapes through the eaves.

4. If necessary the type design might be altered to provide a fire place and chimney.

flay K.

5.

I have told the Executive Engineer not to provide the ridge ventilator pending further instructions.

6.

In the papers furnished to me there is no information as to why the Collector of Anantapur thinks a chimney is necessary for the cook room of the sub-jail at Gooty. If really necessary in this case, it should be necessary in all.

I have the honour to be,

Sir,

Your most obedient servant,

W. S. S. S. S. W. S. S. S. S.

Suby; Engineer, III Circle.
