Difference 299

With reference to your L.O. of 26-12-98 communicating G.O. of 7-1-99 No. 2871 dated 11-11-98, I have the honor to state that the consump-
tion of the black ink powder, during 1895-96 and 1896-97 referred to in para 26 of the G.O. quoted above, is as compared in the margin. The increased consump-
tion of the article in question during the latter year was due to that of former year being reckoned only for 4 months and for Estab-
lishment shown against it from December 1895, the month in which the stationery was supplied, after separation of this Division from Western Division in September 1895.
